## Brief Industrial Profile of Madhubani District

### 1. General Characteristics of the District

Madhubani district is part of Mithalanchal region of North Bihar. The district was carved out from Darbhanga District. The district is backward, however it is famous for its ancient Madhubani painting. The basic infrastructure in the district in terms of transport, communication, power supply, Market system is not so developed. However, the above infrastructure is in progress now a day. The road condition of the district produces a gloomy look as a result of which industrial activities, trade and business etc are in mesh. Storage facilities in form of Cold storage, Warehouses are negligible. Other basic infrastructure like education, health, sanitation and safe drinking water are also insufficient in the district which affects sum total development of the district of Madhuani.

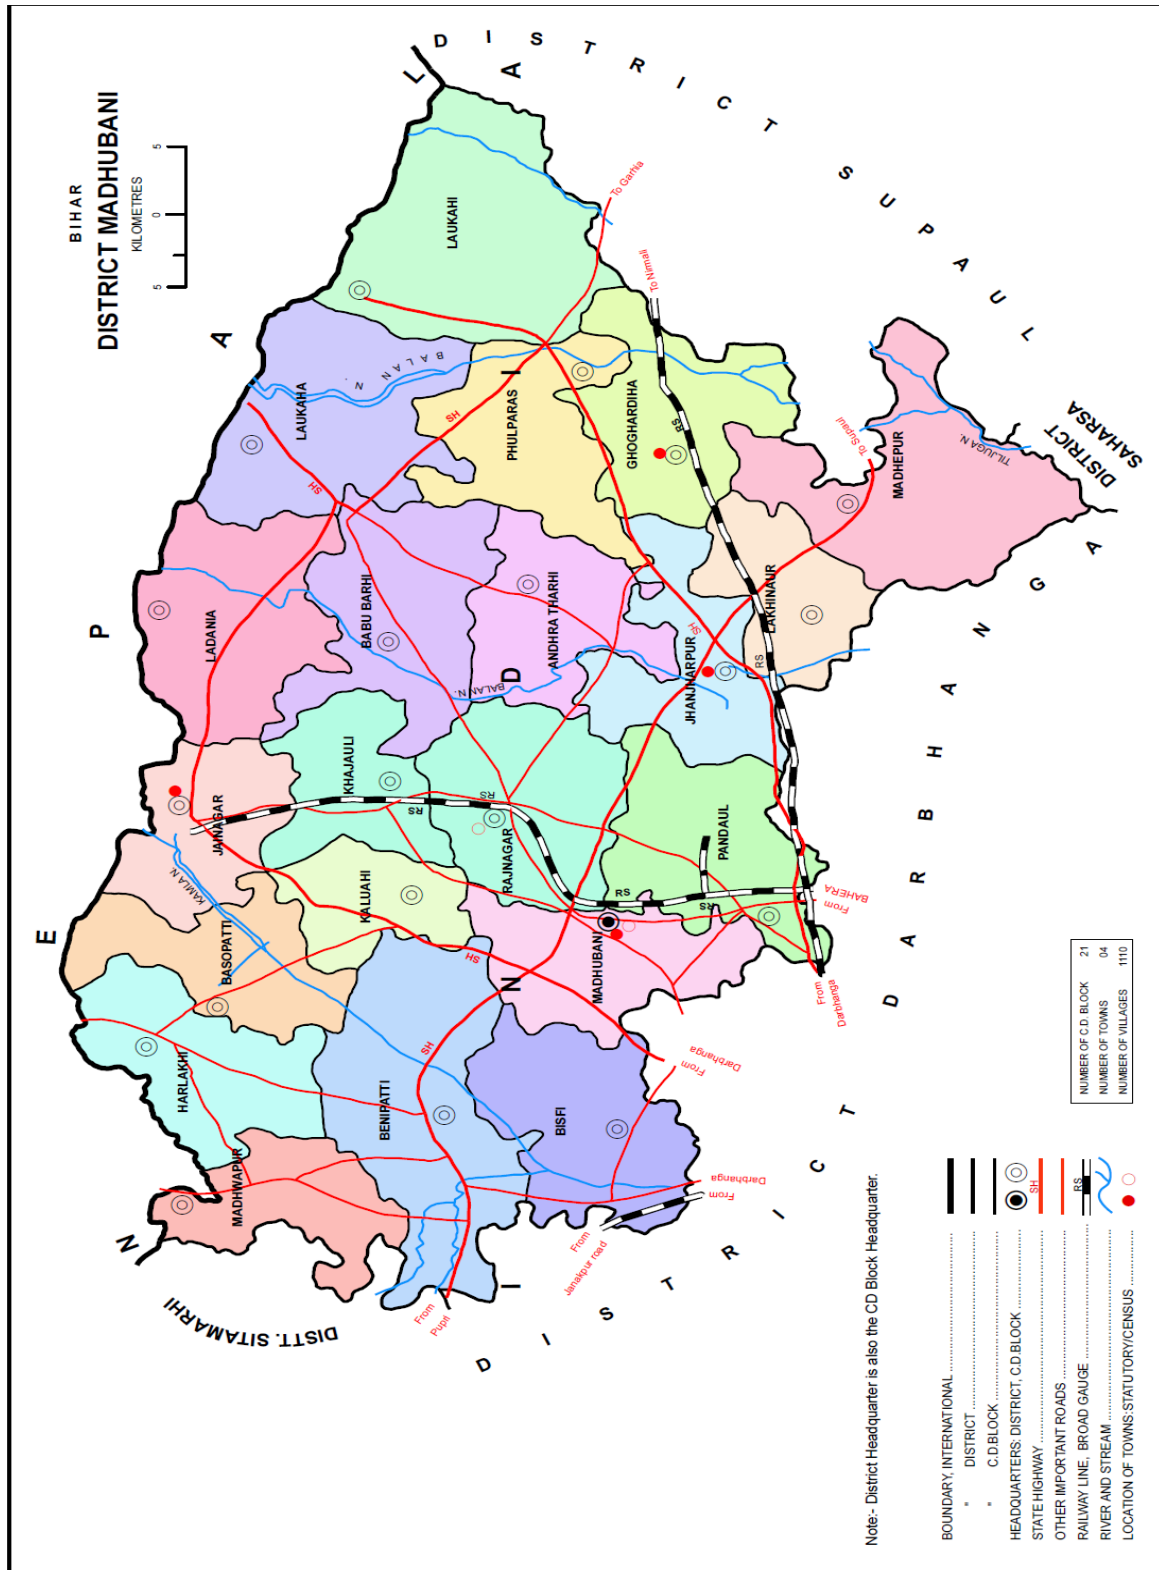

#### 1.1 Location & Geographical Area

The Madhubani district in the geographical arena situated at 85°43' to 86°42' East and 25°59' to 26°39' North and its measures by area is 3501 sq K.M. with average rain fall of 1273.2 mm.

#### 1.2 Topography

The district has very rich & fertile land and is surrounded by three rivers i.e. Koshi, Kamla & Bagmati. All the three rivers originate from Nepal and causes severe damages of Human lives, wealth and live stock during the flood in rainy season. They have been boon for the farmers also they made land very fertile. The climate is cooler and damper than the adjoining districts.

The cold weather starts early generally from the second week of November and the hot weather begins towards the end of March and the rain fall from the later part of June. The district also experiences some winter range.

### 1.3 Climatic Conditions

The climate of this district is generally healthy. There are three well marked seasons, viz, a pleasant cold season, a hot, dry summer and the rainy season. The cold weather begins in November and continues up to February, though March is also somewhat cool. The lowest temperature touches sometime 5°C mark. Westerly winds and dust storm beings to blow in the second half of March and the temperature rise considerably. May is the hottest month when the temperature goes up to about 42°C. Rains set in towards the middle of June when the temperature begins to fall and humidity rises. Though the rains continue till the end of September or the middle of October, these months are not so hot.

### 1.4 Availability of Minerals

As such there is no mineral availability is there in the district under report. The district is formed of thick alluvial soil. Beds of Kankar or nodular lime stone of interior quality are occasionally met with. The river banks are generally made up of new alluvium formed by continuous deposit of soil by the rivers. Sulphur is the only mineral found in the district.

### 1.5 Forest

The district has no forest area.

### 1.6 Electricity and Power

The district receives its entire power supply from the Bihar State Electricity Board. In rural areas, however, the pace of electrification is comparatively slow. However, the Government is trying to extended electric line to the maximum number of villages by implementing various schemes for rural electrification. Total numbers of villages electrified in the district are 693.

## 1.7 Administrative set up

The district is headed by District Magistrate. Under him DDCs then ADMs are posted for looking after the general administration, development and land reformers. At every division there is sub divisional officer called SDO and in every Block Development Officer called BDOs/COs and in every Panchayat Sevak is there.
