The Micro, Small and Medium Enterprises (MSME) sector has been recognized as an engine of growth all over the world. The major advantage of this sector in India is its employment potential at low capital cost. The labour employment in MSME sector is much higher than that of the large enterprises. The MSMEs constitute over 90% of total enterprises in most of the countries with the highest rate of employment growth and a major share of industrial production and exports. In India, MSMEs play a pivotal role in the overall growth of economy. With its agility and dynamism, the sector has shown admirable innovativeness and adaptability to survive in the recent economic recession.

Haryana has taken lead in terms of planned industrial and urban growth compared to neighbouring States, which has resulted in development of new industrial estates including product specific clusters close to the National Capital. The New Industrial Policy launched in August, 2015 of Haryana will boost the growth of MSMEs in the State and open new avenues for cluster development as well. It is hoped that the entrepreneurs will find this document useful for taking investment decisions, besides proving immensely helpful information to various agencies engaged in the promotion and development of MSMEs in the state.

I appreciate the efforts put in by Shri M. K. Verma, Assistant Director (MIT) in preparation of this document. I am also thankful to various government departments, industrial associations and other agencies for giving information and data for compiling this document. Some data has also been obtained from the websites of concerned departments.

# **Brief Industrial Profile of Mewat District**

## **1. General Characteristics of the District**

The Mewat district was carved out from erstwhile Gurgaon and Faridabad districts, which came into existence on 4<sup>th</sup> April 2005 as the 20<sup>th</sup> district of the Haryana State. The main occupation of the people of Mewat is agriculture and allied and agro-based activities. The Meos (Muslims) are the predominant population group and are completely agriculturists. They perceive themselves as such, with a sense of pride. The agriculture in Mewat is mostly rain fed except in small pockets where canal irrigation is available. Agriculture production measured in terms of crop yield per hectare in Mewat is comparatively low to the other districts of the state. Animal Husbandry, particularly dairy is the secondary source of income for people of Mewat and those who live closer to the hilly ranges of Aravali also keep a few sheep and goats. Milk yields are not so low, however, due to heavy indebtedness most of the farmers are forced to sell the milk to the lenders at lower than normal price, which drastically reduces their income from the milk. The poultry population in Mewat is much less in comparison to other districts of Haryana State.

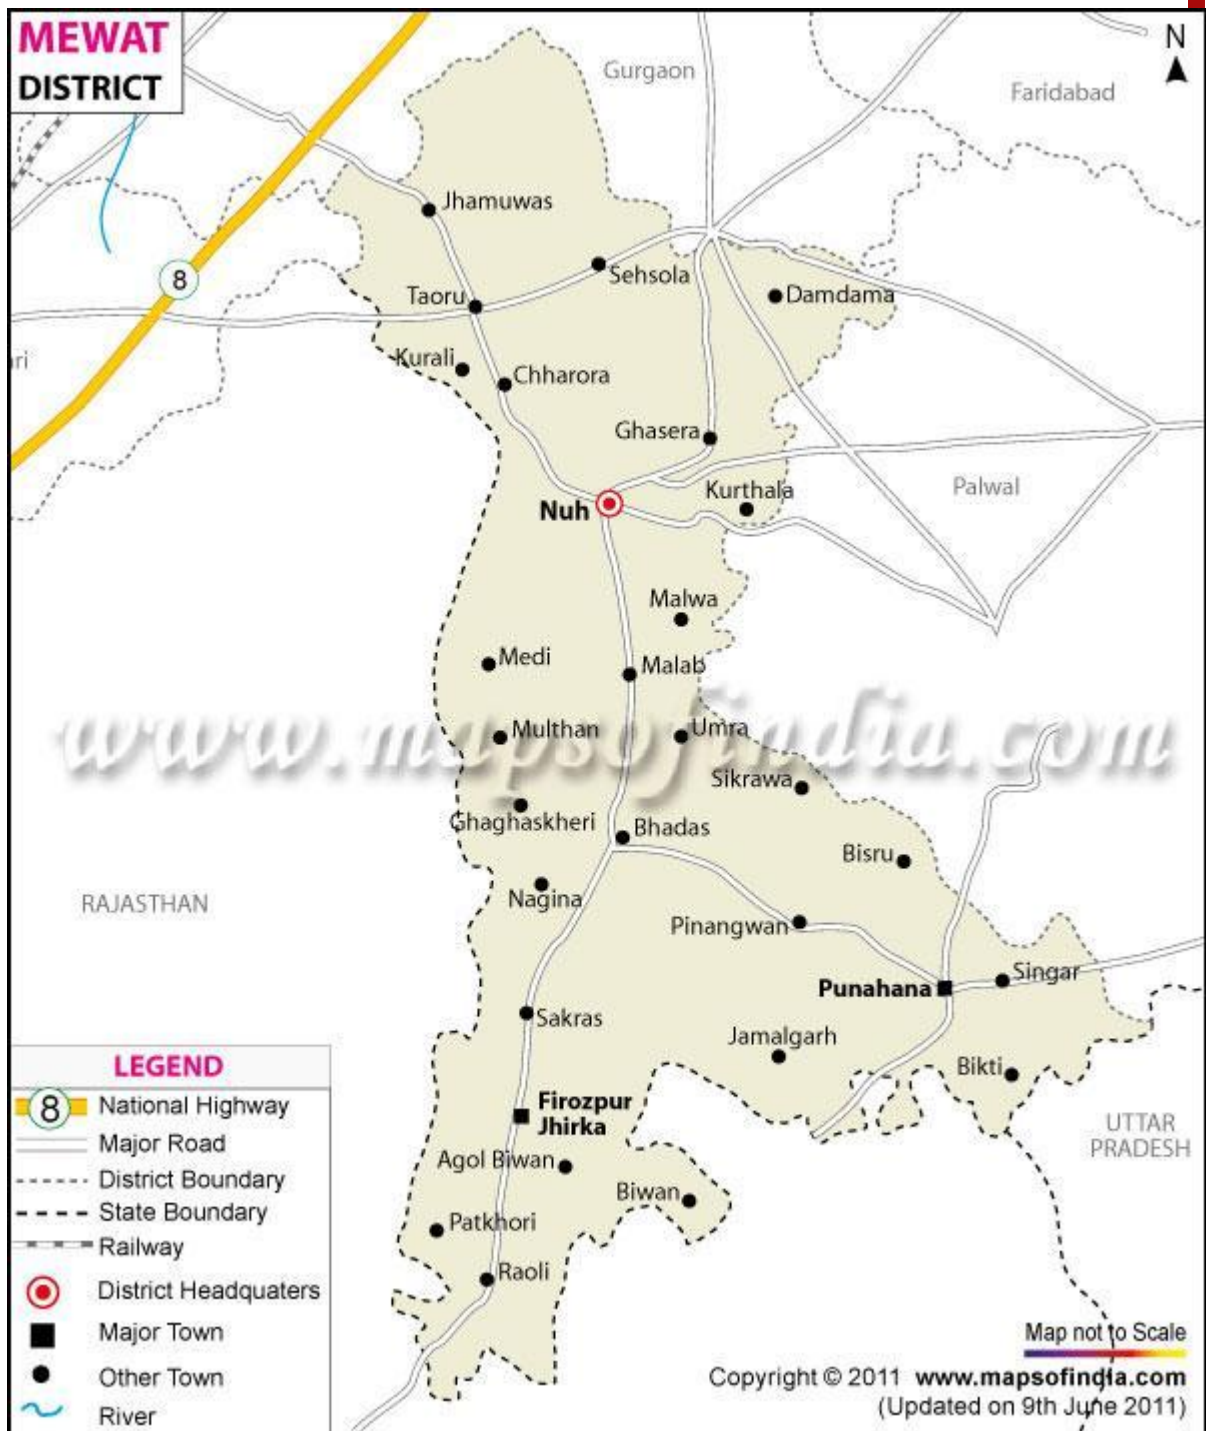

### **1.1 Location & Geographical Area.**

Geographically, Mewat District is situated between 26-degree and 30-degree North latitude and 76-degree and 78-degree East longitude. Gurgaon district bounds it on its North, while Rewari district lies to its West and Faridabad district to its East. On south, the district shares its boundary with the State of Rajasthan.

### **1.2 Topography**

Mewat district is largely comprises of planes. Inconsistency in Mewat topography is evident from its patches of land with hills and hillock of the Aravali Mountain on the one hand and plains on the other. Thus, physio-graphically the area is divided into two tracts- upland and low land.

## Mewat District Map

### 1.3 Availability of Minerals.

The soil of the district is light in texture, particularly sandy, sandy loam and clay loam. The upper hills are mostly barren. The agriculture in Mewat is mostly rain fed except in small pockets where canal irrigation is available. Agriculture production measured in terms of crop yield per hectare in Mewat is comparatively low. There is no mineral except sand in the district.

### 1.4 FOREST

Forest Department is running two schemes namely A forestation and soil Conservation Land Reclamation. As per the National Forests Policy of MOEF, Govt. of India about 1/3 of the geographical area should be under tree cover. In order to achieve this objective various special project large scale plantation on community, Panchayat, Government and Private land were undertaken in last 20 years and saplings of Eucalyptus, Shisham, Neem and other fruit plant were distributed free of costs to farmers to plant in their field. The annual rainfall varies considerably from year to year. The maximum rainfall is experienced during the monsoon season, which reaches its peak in the month of July.

### 1.5 Administrative set up.

The district headquarter is located at Nuh. The district comprises of five blocks namely Nuh, Tauru, Nagina, Firozpur Jhirka and Punhana.
