In the center, there are the transverse chains of small hills which project from the main range and develop higher elevations in the middle portion, where they are parallel to each other and as a result the numerous streams which flow through the valleys have formed parallel drainage pattern. All the rivers in the district, originate from the Sahyadri ranges and have reached their base level of erosion within a distance of 20 kms. All the 8 rivers in the district flow from east to west and merge in the Arabian Sea. River Savitri flows on the northern periphery, forms natural boundary between Ratnagiri and Raigad districts and is navigable for about 35 kms. In Ratnagiri district, the other important rivers are Vashisthi, Jagbudi, Shastri, Bav, Muchkundi, Jaitapur. The district has numerous small creeks and back waters all along the coastal line. Most of the rivers in the district are not perennial though they are over flooded during monsoon due to heavy rains.

E) Total geographical area and area under forest:-

The total geographical area of the district is 8326 sq kms. of which, area under forest is only 5835 Hect. forming 0.71% of the total geographical area.
