Brief Industrial Profile of Sangli District

1) General Characteristics of the District:

There are several interesting stories as to how the name Sangli originated. One of them is that, there were six (6) Gallies i.e. lanes on the bank of the Krishna River hence the name “SANGLI”. The second one is that, the name of the village was Sangalki in Kannad language so in Marathi it became Sangli. Another belief is that the confluence of Warna and Krishna rivers is near Sangli village. The word of confluence in Marathi is ‘Sangam’ and the Sangli is distorted version of the word Sangam.

Sangli is among the largest grape producing districts in India and houses a large wholesale grape market. The industrial town of Kirloskarwadi is also situated in Sangli District. Industrialist Laxmanrao Kirloskar started his first factory at this place. Kirloskarwadi is one of the most beautiful industrial towns in India.

5	Value of Exports from the clusters	Rs. 80/- crores
6	Employment in Cluster	2000 Nos.
7	Average investment in plant & Machinery	Rs. 15 lakhs
8	Major issues/requirement	Present Raisin making process is through conventional & unhygienic method, De- steaming, Grading & sorting processes are done manually which are costly and time consuming. Globally there is good demand for Raisins produced in Sangli cluster, but since the product is not certified as per the codex standard direct export is not possible, Lack of Automatic packaging facility for Raisin. Presently packed in bulk form.
9	Presence of capable institutions to be associated	<ol style="list-style-type: none"> 1) National Research Centre for grapes, Pune. 2) Central Food Technological Research Institute, Mysore. 3) Maharashtra Grape Growers Association, 4) Agricultural Colleges and Technical Institutions, Engineering and Management Institutes.

10	Thrust Areas	Trust building amongst cluster actors, capacity building of the enterprises, technology upgradation, international exposure with respect to the present international standards.
11	Problems & Constraints	<ul style="list-style-type: none"> • Lack of facilities for manufacturing of Hygienic Raisins. Due to open to sky i.e. open drying of the grapes produced would lead to more wastage and unhygienic raw material to produce raisins. • Limitation for segregating Raisins based on size & colour. • Non availability of Testing Facilities to carry out analysis of contents of Raisins produced. • Facilities for Export Quality Packaging is not available. • Non assured quality restricts scope for Direct Exports in value chain. • Failed to establish as recognized location specific brand i.e. Sangli Raisin.

9	Presence of capable institutions to be associated	1) Dattajirao Kadam Technical Institute, Ichalkarnji , Dist. Kolhapur 2) Walchand Engineering Collage, Sangli

10	Thrust Areas	Trust building amongst cluster actors, capacity building of the enterprises, technology upgradation, international exposure with respect to the present international standards.
11	Problems & constraints.	<ul style="list-style-type: none"> • Proper sizing of yarn is very much required for quality manufacturing of fabric. • Through sampling centre garment units can develop various patterns & designs • Auto cutting facility will help for uniform bulk cutting of fabric and reduce fabric waste. • Facilities of laundry & auto pressing would save time and manufacturing cost of cluster units • Considering the cost for establishing these facilities is not affordable economically for single micro enterprise in the cluster. • To address the issues and concerns, creation of State of Art CFC consisting facilities of common sizing, auto cutting, sampling washing, auto pressing with common product testing laboratory are necessary. (Common Facility Centre created under MSE-CDP has been providing services to cluster beneficiaries for various requirement/need based services)
