FOREWORD

The Micro, Small and Medium Enterprises (MSME) sector has been recognized as an engine of growth all over the world. The major advantage of this sector in India is its employment potential at low capital cost. The labour employment in MSME sector is much higher than that of the large enterprises. The MSMEs constitute over 90% of total enterprises in most of the countries with the highest rate of employment growth and a major share of industrial production and exports. In India, MSMEs play a pivotal role in the overall growth of economy. With its agility and dynamism, the sector has shown admirable innovativeness and adaptability to survive in the recent economic recession.

Haryana has taken lead in terms of planned industrial and urban growth compared to neighbouring States, which has resulted in development of new industrial estates including product specific clusters close to the National Capital. The New Industrial Policy launched in August, 2015 of Haryana will boost the growth of MSMEs in the State and open new avenues for cluster development as well. It is hoped that the entrepreneurs will find this document useful for taking investment decisions, besides proving immensely helpful information to various agencies engaged in the promotion and development of MSMEs in the state.

I appreciate the efforts put in by Shri M. K. Verma, Assistant Director (MIT) in preparation of this document. I am also thankful to various government departments, industrial associations and other agencies for giving information and data for compiling this document. Some data has also been obtained from the websites of concerned departments.

3. INDUSTRIAL SCENERIO OF YAMUNANAGAR

Yamuna Nagar is well known for its industries. It has emerged as an important industrial destination in the state. This has been despite its relatively isolated location from rest of the state. Due to expanding industries, the city kept on extending geographically. This is primarily due to an increasing number of immigrants. This led to an intermixing of diverse culture. It also has to do with the rural ambiance which is reported to have undergone a lot of change. With increasing population, the trading aspects became brighter and the city went on becoming the second highest revenue generator of Haryana, immediately after Faridabad that owes its position largely to its prime location.

The city produces sugar machinery, paper machinery along with highly efficient equipments for petro-chemical plants, which are shipped to various refineries across the country. The city is also known for its Plywood productions, which is attributed to the easy accessibility of primary raw material – poplar tree. It has also one of India's largest railway carriage and wagon repair workshops. Recently, Reliance Industries has also installed a thermal power plant in the town. Haryana Urban Development Authority has done major development work in the land-stretch linking the city with Jagadhri, the other part of twin city.
