## FOREWORD

The Micro, Small and Medium Enterprises (MSME) sector has been recognized as an engine of growth all over the world. The major advantage of this sector in India is its employment potential at low capital cost. The labour employment in MSME sector is much higher than that of the large enterprises. The MSMEs constitute over 90% of total enterprises in most of the countries with the highest rate of employment growth and a major share of industrial production and exports. In India, MSMEs play a pivotal role in the overall growth of economy. With its agility and dynamism, the sector has shown admirable innovativeness and adaptability to survive in the recent economic recession.

Haryana has taken lead in terms of planned industrial and urban growth compared to neighbouring States, which has resulted in development of new industrial estates including product specific clusters close to the National Capital. The New Industrial Policy launched in August, 2015 of Haryana will boost the growth of MSMEs in the State and open new avenues for cluster development as well. It is hoped that the entrepreneurs will find this document useful for taking investment decisions, besides proving immensely helpful information to various agencies engaged in the promotion and development of MSMEs in the state.

I appreciate the efforts put in by Shri M K Verma, Assistant Director (MIT) in preparation of this document. I am also thankful to various government departments, industrial associations and other agencies for giving information and data for compiling this document. Some data has also been obtained from the websites of concerned departments.
