Brief Industrial Profile of UDHAM SINGH NAGAR District

1. General Characteristics of the District

In the vicinity of the spectacular Kumaon lies the district of UDHAM SINGH NAGAR which was a part of district NAINITAL before it gained the identity of a separate district in October 1995.

Udham Singh Nagar is basically an industrial district and many industry related professions are prevalent here, it is perfect example of 'Unity in Diversity' for which India is so widely known, on the other hand different cultures, religions and life styles are blended in absolute harmony. The fertile land lends itself to different forms of agriculture giving rise to agriculture related activities and industries making this land a green place which has resulted into prosperity all around. Pantnagar University is a leading temple of learning in the fields of agriculture and technology with one of the finest built university all around the world. This place has rare sight seeing as it is surrounded by Kumaon Himalayas on one side and Nepal on the other (Tanakpur touches the Khatima border which is in Champawat district).

1.3 Agriculture:

Department of Agriculture was set up in 1875. Initially, the Department of Agriculture was limited only to compiling statistics and to establish model form. In 1880, it was attached to the Department of Land Records. After implementation of Govt. of India Act 1919 and as a result in order to establish State Agriculture Policy, the Agriculture Department came into existence on 01.12.1919. After Uttarakhand State came into existence in the year 2000, Uttarakhand Govt. had notified the restructuring of the Agriculture Department on 02.08.2003.

The Major Crops in the District are Rice, Wheat, Barley, Maize, Mandua etc. Statistical details on the crops are available in details for District at a Glance (Sl. No. 3.1)

1.4 Horticulture:

Uttarakhand is known for its horticultural crops, which include fruits, vegetables, off-season vegetables, floricultural crops, medicinal and aromatic plants. Horticulture is one of critical sectors in the economy of the hill state of Uttarakhand. It provides much needed opportunity for diversification and increased employment in the state where the scope of high rate of growth in conventional agriculture is rather limited due to peculiar topography and majority of scattered and marginal holdings. Uttarakhand shared 2.81 per cent of all India area under fruits.

1.5 Availability of Minerals

The knowledge regarding occurrences of minerals in the district is scanty. There is no major mineral in the District except river sand and stones.

1.6 FOREST

Total Forest area: 93737.02 Hectares.
