Brief Industrial Profile of Jalpaiguri District **(WEST BENGAL)**

1. General Characteristics of the District:

The district of Jalpaiguri occupies a prime position in the domain of North Bengal. It stretches over an area of 6227 sq. kms (Census, 1991) and has its headquarters in Jalpaiguri. The economy is chiefly agrarian although the industrial belt is gradually attempting to expand its periphery.

The sprawling tea gardens of the Dooars area constitute the chief asset of this district. Other major agrarian products of the district like jute, paddy, potato, etc. also make a significant contribution to the district's revenue pool. Forest resources of the district constitute another major resource of the district.

1.1 Location & Geographical Area.

The district enjoys a strategically important location as it serves as a corridor of trade and communication with the various north-eastern States of India. It stretches between the gridlines 27°N to 26°16' N latitude and 89°53' E and 83°25' E longitude. It touches the boundaries of Bhutan and Darjeeling in the north, Assam (Goalpara) in the east, Coochbihar in the south and Bangladesh in the south-west.

The district topography wears a mixed look – consisting both of hilly areas and undulating plains coupled with vast flat plains. Three district physiographic units can be identified in the district (a) the northern hilly terrain which is a part of the sub-Himalayan Ranges, (b) the sub-montane central tract, locally called Bhabar and (c) the gently sloping alluvial plain in the south locally called Terai.

1.2 Topography

The soil in this region ranges from alluvial soil to sandy and clayey soil. The soil can be broadly classified under two heads – a) the terai soils covering almost the entire district and b) the brown forest soil covering the northern foot hills of the district. However, the soil is predominantly sandy and hence porous with low water holding capacity.

The alluvial soil is fertile enough for crops like paddy, jute and tea to be grown. This kind of soil is brought down by hilly rivers like Teesta, Torsa and Mahananda. The rivers often overflow their banks depositing layers of fertile soil on the banks on either side.

In the upper region to the north of the Duars, the soil is mainly hard, black and clayey. This soil is suitable for growing tea which is a major cash crop of this region. In the lower plain land the soil consists of a mixture of both clay and sand.

India is said to be a land of rivers and the district of Jalpaiguri bears enough proof of this statement. There is a network of rivers criss-crossing the entire region. The

major ones are Teesta, Torsa, Mahananda, Jaldhaka, Kaljani, Raidak, Korotowa and Sonkos. These are joined by smaller streams like Galandi, Dudua, Tasati, Mujnai and their likes. The rivers are in full spate during the monsoon season and navigation along them becomes risky. Agricultural activity in the district is largely dependent on the various irrigation projects which have been built on these rivers.

1.3 Availability of Minerals.

PRODUCTION OF MINERAL 2010-11

1.4 Forest

It is believed that the district of Jalpaiguri has derived its name from the 'Jalpai' trees (olive trees) which grow abundantly in the forests covering the northern hilly terrain. The district is blessed with rich reserves of forest resources. The presence of vast hilly tracts covered with dense forests with sparkling streams flowing through them has attracted tourists from all over the world.

The forests, covering 179000 hectares of land which is 27.8% of the total geographical areas, are home to a fascinating variety of flora and fauna. The vegetation is mostly deciduous semi-evergreen with sal as the dominant species. The timber produced in these forests is very valuable and is used for building furniture, doors, windows and other wooden fixtures. Social forestry is also becoming popular now-a-days with trees like Eucalyptus, Simul, Krishnachura, etc. being widely cultivated.

The forested hilly ranges have also given birth to several major Wild Life Reserves – namely Jaldapara, Buxa Tiger Reserve, Garumara, Chapramari and Hollong. They serve as popular tourist resorts. The rich bio-diversity in the sanctuaries of Jaldapara and Chapramari is a striking treat for the eyes. Trekking routes along the Sinchula Range provide magnificent scenic views of nature in its pristine form. Chotashinchula peak (5695 fee) is the highest point of the district. These ecologically fragile zones should be preserved and protected from environmental degradation.

Minor forest produce like bamboo, cane, honey, wax, etc. are also found in the forest areas. Bamboo and cane furniture is manufactured both in the rural and urban areas. Timber and fuel are the major forest produce.

1.5 Administrative set up.

The administrative set up of Jalpaiguri district consists of three Sub-Divisions viz. Sadar Mal and Alipurduar with district headquarters at Jalpaiguri. The three sub-Divisions have 17 police stations under their jurisdiction. There are 13 blocks or Panchayat Samities and 4 Municipalities in the district – 4 blocks and 2 Municipalities in

Sadar Sub-Division, 3 blocks and 1 Municipality in Mal Sub-Division and 6 blocks & 1 Municipality in Alipurduar Sub-Division. Under the jurisdiction of these blocks, there are 718 inhabited villages with 756 Mouzas governed by 146 Gram Panchayats.

The table below shows the sub-Divisionwise distribution of blocks, villages and Gram Panchayats (Year – 2014)

Name of the Sub-Division	Police Station	C. D. Block/M	No. of Gram Panchayats	No. of inhabited villages
Sadar Sub-Division.	6	4/2	58	231

Source: District Statistical Hand Book, 2014

The administrative structure of the district also rests on the framework provided by the existence of 4 Municipalities and 1 Municipal Corporation. Part of Siliguri Municipal Corporation belongs to Jalpaiguri district.

18	Tista Fruit & Vegetable Processing.
19	Phyto Chemical Complex

3.9 Service Enterprises

Potentials areas for service industry

Cold Storage, Automobile Body Building & Repairing services relating to transport.

3.10 Potential for new MSMEs

Setting up new industrial ventures or optimally exploiting the existing resources depends to a large extent on the availability of suitable infrastructure, a strong capital base, abundance of resources like land, labour and entrepreneurship, assured markets for the products and a multiple other factors. The district of Jalpaiguri cannot boast of being in a very favourable position as far as the aforesaid factors are concerned. Yet its strong agricultural base prepares the ground for setting up agrarian industries.

Jalpaiguri is undoubtedly an agriculture based economy and with this background in mind various prospective agro based industries have been suggested below. Significant deposits of dolomite and other minerals like limestone, coal, stone etc. makes the district prospective for industrial development. Jalpaiguri also has a rich

reserve of forest resources. The sericulture units in Jalpaiguri sadar Block and in Alipurduar Block also offer scope for expansion. The tea industry in the district is a traditional investment which with adequate modernisation can pave the way to setting up of various ancillary units like those engaged in pruning knives or in solvent extraction from tea waste etc. Similarly, special mention should be made about mushroom canning industry. The district is agro climatically suited for mushroom production and especially “button mushroom” which has tremendous export potential. Thus, considering the resources, the existing infrastructure and the general framework of the district, a few candidate industries, both resource based and demand based have been suggested in this Chapter after detailed discussion with various agencies like DIC, Bank, various State Govt. Departments and other local bodies.

A) Resource-based Industries

- | | |
|---|---|
| 1) Rice mill | 16) Animal fat utilisation for production of pork choke and oil |
| 2) Solvent extraction from rice bran | 17) Pre-cast building blocks from rich reserves of dolomite, limestone and sand |
| 3) Rice processing | 18) Sericulture units – silk reeling |
| 4) Solvent extraction from tea waste | 19) Honey production |
| 5) Tomato sauce, chilli sauce | 20) Spice grinding |
| 6) Vegetable dehydration | 21) Processing of pulses |
| 7) Fruit preservation and processing | 22) Dairy farm |
| 8) Mushroom canning | 23) Stone crushing |
| 9) Jam, jelly from pineapple, orange, lemon | |
| 10) Pickles and chutneys from mango | |
| 11) Ginger oil and ginger powder | |
| 12) Oleo resin | |
| 13) Meat processing and for human consumption | |
| 14) Tanning of leather | |
| 15) Leather processing | |

B) Demand-based Industries

- | | |
|---|------------------------------------|
| 1) Manufacturing of agricultural tools and implements | 12) Ceramic novelty items |
| 2) Agro service centres | 13) Readymade garments |
| 3) Cold storage | 14) Textile, silk printing |
| 4) Bio-fertilizer units | 15) Moulded plastic articles |
| 5) Repairing and servicing of diesel pumpsets | 16) Automobile repairing |
| 6) Repairing and servicing of electronic items | 17) Automobile smoke testing units |
| 7) Bread and biscuit | 18) Paints and varnishes |
| 8) Handicraft products | 19) Clay bricks |
| 9) Wooden furniture and fixtures | 20) Nuts and bolts |
| 10) Cane furniture | 21) Storage battery assembling |
| 11) Handloom products | 22) Cry cell battery |
| | 23) Soft drinks |
| | 24) Pesticide formulations |
| | 25) Terracotta pottery |

- 26) Washing soap and powder
- 27) Washing soap and powder
- 28) Mosaic tiles
- 29) Paper cups and plates

- 30) Repairing and servicing of bi-cycles and cycle rickshaw

4. Existing Clusters of Micro & Small Enterprises

- 1) Name of the cluster: IID Cluster at Dabgram, Jalpaiguri.

A proposal for upgradation of IID centre at Dabgram has been recommended and sent to O/o DC, MSME but the same has currently been deferred.

SPV coordinator - Managing Director, WBSIDC,
Shilpa Bhawan, 2nd floor,
31, Black Burn Lane, Kolkata-700012

After upgradation of the IID centre 360 people are expected to be benefitted.

Total Project Cost : Rs. 787.27 lakh
GOI Grant : Rs. 472.36 lakh
GOWB Contribution : Rs. 314.92 lakh

5. STEPS TO SET UP MSMEs

A brief description of different agencies for rendering assistance to the entrepreneurs is given below :

S. No	Type of assistance	Name and address of agencies
