Brief Industrial Profile of Ajmer District

1. General Characteristics of the District

The district derives its name from the head quarter town of Ajmer. It comprised of two districts viz. Ajmer and Merwara before independence and the ancient name of city was 'Ajaymeru'. The Sanskrit word 'Meru' means a hill and Ajay used as a qualifying adjective to mery (hill), implying that this hill was invincible or un-conquerable by enemies probably due to its inaccessibility. The ancient name Ajaymeru later became Ajmer through colloquial terminology. Ajmer was also combining of the name of Raja Ajaypal. The traditional founder of the city and the fort (Taragarh) in Merwara. Since this expressed the physical feature only, the former meaning appears to be more plausible rather than indentifying with Ajay Raja.

Ajmer was founded by Raja Ajaipal Chauhan in the 7 century A.D. It remained a strong hold of the Chauhans till 1193 A.D. when Prithvi Raj Chauhan the last Hindu ruler lost it to Mohammed Gauri, than become part of Delhi Sultanate, but Rana Kumbha of Mewar and Raja Maldeo of Marwar established Rajput rule over Ajmer. From then onwards, Ajmer became battle ground for power between the Rajputs, Mugals and Marathas, the British finally annexed it after the treaty in 1818 A.D. with Maratha chief and held Ajmer as a Chief Commissioner's pride. During the British rule, it was considered expedient for purely political considerations that this small but strategic area or Ajmer should be retained and administrated by the Central Government. After independence State Govt. extended its claim over Ajmer with the argument that geographically, ethnological and linguistically Ajmer is and has been an integral part of Rajasthan. The re-organization Commission constituted for the purpose investigated case for merger and finally recommended and consequently the region or Ajmer was merged with Rajasthan on 1st November 1956 and became one of the eminent district of Rajasthan State. Today this place is not only known for holy Pushkar Lake & Beautiful temples on one hand and the Durgah of Khwaja Moinuddin Chisti on the other hand but also an important trade, commerce industrial and transportation centre of Rajasthan.

1.1 Location & Geographical Area.

Ajmer District is situated in the centre of Rajasthan State lying between 25⁰38" and 26⁰58" North Latitudes and 73⁰54" and 75⁰22" East Longitudes. The district is surrounded by Jaipur and Tonk district in East and Pali district in west, Nagaur district touches its North boundries while Bhilwara district in the South, the total geographical Area of Ajmer district is 8.50 lac hectares, for land utilization purpose, the area was reported 8.42 lacs hectares in 2007-

2008. Ajmer district stands at 16th place among the existing 33 districts of the State so far its total area is concerned.

Topography

The district has no natural division. Its boundaries are territorial and composed of four sub-divisions namely Ajmer, Beawar, Kekri, and Kishangarh. Ajmer sub-division forms the Northern part of district and is more or less triangular in shape, Beawar sub-division is an irregular terrain lying the south-west of district. The terrain is generally hilly. Kekri sub-division forms the south Eastern portion of the district and consists of two narrow strips of land separated from each other. The distinguishing feature of the district is the Arawali range, which comes into prominence near the town of Ajmer. About 16 km. the hills disappear for a short distance but again form a compact double range in the neighbourhood of Beawar.

Availability of Minerals.

The geology of district is that of the Aravalli range which extends through out the district except the North-Western part which is flat and plain and covered by sand dunes. Almost whole of the area shows very steep vertical cliffs and the rocks are repeated several times in the section. It is quartzite section which forms highest peaks above the general level of range at Taragarh near Ajmer. The best rocks in the region are granites, felspathic schists, calcareous marble and quartzites exposed along the Ajmer Nasirabad pass. Gneiss and granite are predominant towards Beawar section but towards Ajmer, the granite alternates with limestone, mica schists and Felspathic quartzite, coarse grained marble, lime and building stone is seen in the South West plains of Ajmer. Among other minerals found in the district are mica, asbestos, vermiculite, soap stone, masonry stone and brickclay. Granite deposits, are found at (Sendra), Beawar, Bandanwara and Kishangarh.

PRODUCTION OF MINERALS

S.No.	Name of Minerals	Year 2010-11
1.	Felspar	332378.20
2.	Quartz	93436
3.	Asbestos	Nil
4.	Lime Stone	1080716.5

FOREST

The forest crop in the Ajmer district is very poor and the commercial tree like teak, Sal and Shisham do occur but hardly reach an appreciable size in the area. The important species of Ajmer district forest are Dhokra, Salar, Khejra, Khair, Ber, Aranja and Koulasse and the *Cenchrus ciliaris*, *Schima marvosa*, *dichanthium annulatum*, *Chloris barbata*, *Chrysopsis* etc. are the important grasses. In the absence of dense forest in the district, the tiger is seen very occasionally in the Beawar forests. Leopards and hyenas are found in the hills of Nagpahar to Dawair. Black duck, ravine deer and Nilgai are found in Ajmer and hazes, partridges and gray are common and found in all seasons.

Administrative set up.

The Ajmer district is presently composed of four sub-divisions viz; Ajmer, Beawar, Nasirabad, Masuda, Kekri and Kishangarh with a view to have better control and smooth working. The sub-divisions have further divided into 9 Tehsils namely Ajmer, Beawar, Nasirabad, Kekri, Kishangarh, Masuda, Bhinai, Pisangan and Sarwar and eight Panchayat Samities namely Shrinagar, Pisangan, Jawaja, Masuda, Bhinai, Kekri, Silora and Arain. The details of the administrative setup are shown below

3. INDUSTRIAL SCENARIO OF AJMER DISTRICT

Industries are necessary for development of the State. It indicates an optimum utilization of available minerals, agriculture, live stock and other resources for increasing Industrial production, creating additional employment opportunities, eliminating regional imbalances, entrepreneurship and augmenting the financial resources of the state. In Ajmer district 8 medium scale Industries and 17663 small scale & cottage Industries were registered up to March, 2011. The total investment involved was Rs. 92797.54 lac. giving employment opportunities to about 87420 persons. The main Industries of the district are based on textile, food products, leather and leather products, wood products, felspars and quartz grinding, marble, asbestos and cement.

3.4 Large Scale Industries / Public Sector undertakings

List of the units in Ajmer & Near By Area

- (1) Hindustan Machine Tools Ltd., Ajmer
- (2) Shree Cement Limited, Beawar.
- (3) R.K. Marbles Ltd. Ajmer
- (4) Costmet Works Pvt. Ltd. Kharva-Masuda

3.5 Major Exportable Item

- (i) Engineering goods,
- (ii) Mineral based ball Mill,
- (iii) The Emery stone flour mill.
- (iv) H.M.T Machines.
- (v) Marble & Granite.
- (vi) Cement.

3.6 Growth Trend

(i) The existence of large and medium industry viz. (1) Ajmer Dairy (2) Raghuvver Metal Industry Limited (3) H.M.T. Unit (4) Shree Cement Ltd. (5) R.K. Marbles Ltd. (6) Ultra Food (7) Ajmer Food Product Pvt. Ltd. (8) Costmat Works Pvt. Ltd. is the another advantage to the district for putting more units as ancillaries to these

industries. This also reveals that in Ajmer district, the persons have developed entrepreneurial skill and are also financially sound to set up the industrial units in the area.

(ii) Loaning facility in Ajmer district is available both in towns and in Panchayat Samiti levels through commercial bank, Regional Rural Banks and Khadi and village Industries Commission (KVIC), thus giving impetus to new entrepreneurs to establish industrial units in urban as well as in rural area of the district.

3.7 Vendorisation / Ancillarisation of the Industry

(1) The large scale units in Ajmer district engaged in the manufacture of textile, cement and machine tools, Textile and cement units are vertically integrated and they do not give rise to many ancillary arrangements. However, engineering support units like Engineering workshops and packing supply units like HDPE bags units can be set-up on these units either at Beawar or at Ajmer.

(2) In a large industry like Hindustan Machine Tools Ltd. there is bound to arise a large of various shapes, types and qualities of plate and sheet cutting which can be gainfully utilized as a raw material stock by small scale industry. Some of the various processes that may be used by the small units to manufacture are forging, casting, fabrication, welding, repairing, machining, assembling, electroplating, etc. Such specialized job work can be better undertaken by the small industries and the large industry should readily off-load such work and allocated the free capacity for other more important and highly sophisticated types of work.

(3) The proposed ancillaries of Toshniwal Industries are :

(1) Machine components (2) Sheet metal parts (3) Electroplating and Die casting. (4) Electronic components can be set-up at Ajmer.

3.8. Medium Scale Enterprises

3.8.1 List of the units in Ajmer & Near By Area

- (1) Ajmer Zila Dugdhd Utpadak Sangh Ltd., Ajmer
- (2) Ultra Food & Feed, Gagwana
- (3) Ajmer Food Product Pvt. Ltd.
- (4) Raghuvveer Metal Industry Limited.

3.8.2 Major Exportable Item

- (i) Engineering goods
- (ii) P.H. Meter, temperature detectors
- (iii) Thermocouple,
- (iv) Skimmed Milk Powder

3.9 Service Enterprises

1. Offset Printing
2. Leather Bags repairing
3. Cycle repairing
4. Watch repairing
5. Type writers repairing
6. T.V. Transistor repairing
7. Battery charging
8. Sewing machine repairing
9. Water pump repairing
10. TV Repairing
11. Mobile repairing
12. Automobile repairing
13. Tiffin Centre
14. Printing press.
15. Computer hardware repairing shop.

3.9.1 Potentials areas for service enterprises

1. TV Repairing
2. Mobile repairing
3. Automobile repairing
4. Tiffin Centre
5. Printing press.
6. Computer hardware repairing shop.

3.10 Potential for new MSMEs

List of Potential enterprises

1	Oil Expeller
