Brief Industrial Profile of Jaipur District

1. General Characteristics of the District

This famous city is the capital of Rajasthan and has earned universal renown as the "Pink City", and pink it is, with beautiful constructed palaces, havelis and forts. Tall, rugged men with handle-bar whiskers sport bright pink turbans. Jaipur which means the city of victory was built exactly 273 years back and is 262 km by road from Delhi (Capital of India). A strong wall encircles the old city and even today has a suggestion of formidable strength, its function of protecting all within is obvious.

The plains of Rajasthan of which Jaipur is the capital once thundered and echoed with clash of swords and the drums of wars. Built in 1727 by Sawai Jai Singh-II, Jaipur was the first planned city of its time (the earlier planned city in northern India having been built near Taxila sometime in the 2nd century BC).

There is a feast in store for tourists. Attractive monuments where one can breathe the fragrance of history. Comfortable and luxurious hotels, once the proud of kings, parks, gardens, and excursions of nearby places of interest, make Jaipur a tourist's paradise.

1.1 Location & Geographical Area.

The district is situated in the eastern part of Rajasthan and lies between 26°32' and 27°51' north latitudes and 74°55' and 76°50' each longitudes. It is bounded in the north by Sikar and Alwar district of Rajasthan in south by Tonk, Ajmer and Sawai Madhopur, Sikar and Ajmer district in the west and in east by Dausa & Sawai Madhopur district. The Jaipur district has a geographical area of 14068 Sq.Km., which is 3.23% of the total area of the State.

1.2 Topography

A large part of the district is covered by a thick mantle of soil, blown and alluvium. The area to the east and north of Jaipur is occupied by hill range rising to over 200 meters above the surrounding plain. The district is drained by a number of largely non-perennial rivers of which Banganga and Sabi are the important ones. The Banganga has been impounded near Jamva Ramgarh. Which was providing a major share of drinking water supply to Jaipur in past but presently the Ramgarh Dam itself is facing an acute crisis of water to be restored.

1.3 Availability of Minerals.

A variety of mineral deposits are found in the district. A few major of them are China Clay, Copper, Dolomite, Iron, Lime Stone, Silica Sand, Soap Stone. Production of major minerals is as under:-

PRODUCTION OF MINERAL 2010-11

S. No.	Name of Minerals	Production (in Tones) 2010-11

1.4 Forest

About 5% of the total area of the district was under forest. Subsidiary edaphically types of dry tropical forest are found in the district where Dhok or Dhokra is the most common tree. Other species found are Adossa, Gurjan, Salar, Jhingha, Babul, Siris, Bar, Gular, Pipal, Shisham Peelu, Hingota, Karaya, Khejra, Kair and Jamun. The timber

obtained from the forest of the district is utilized for the manufacture of agriculture implements besides being used for roofing as well as for fuel purpose.

1.5 Administrative set up

Being a state capital Jaipur has Legislative Assembly, Secretariat, State level offices of maximum Government departments with divisional and district level offices. There are 13 Tehsils and the same number of Panchayat Samities and Sub-Division. The total numbers of towns are 13, Jaipur being most populated city followed by Choum, Kotputali and Shahpura.
