Brief Industrial Profile of Karaikal District

1. General Characteristics of the District

Karaikal is on the east coast about 140 kms south of Pondicherry and 300 kms south of Chennai (Madras) located on the Coromandel Coast of the Bay of Bengal.

Karaikal is known all over the country for its unique and the only temple devoted to the **Lord Saneeswara**(Lord Saturn) at **Thirunallar**. Those who are troubled by vicissitudes in life and wish bright future do spare their time to pay obeisance to the Lord Saturn. More than two thousand pilgrims visit this temple everyday. The **Sani Peyarchi** festival is the "**Kumbh Mela of Pondicherry**" attracting lakhs of devotees.

Pondicherry is the Capital of this Union Territory. Pondicherry is on the east coast about 162 kms south of Chennai (Madras) located on the Coromandel Coast of the Bay of Bengal.

Karaikal is the **Gateway** to various places of worship in the eastern coast of Tamilnadu.

Two famous shrines, **Velankanni** for Christians and **Nagore** for Muslims are nearby Karaikal. **Tranquebar Fort** (Tharangampadi Kottai) is just 8 kms from here.

Languages and Religion:

Main languages spoken in the district are **Tamil, Telugu and Malayalam**.

1.1 Location & Geographical Area.

Karaikal Lies Between 10°49 to 11°01 in North and Between 79°43 to 79°52 in east. Karaikal is situated 150km down south from Puducherry it is very near to the Nagapattinam Dist. The Geographical area of the karaikal dist is 160Sq.km

1.2 Topography

Forming part of the fertile Cauveri delta the region is completely covered by the distributaries of Cauveri. Covered completely by a thick mantle of alluvium of variable thickness, the lie of the region is flat having a gentle slope towards the Bay of Bengal in the east. It is limited on the north by the Nandalar and on the south-east by the Vettar. The group of rocks known as Cuddalore formations is met with in the area contiguous to Karaikal region in Nagappattinam District.

1.3 Availability of Minerals:

Karaikal area is completely covered by a thick mantle of alluvium and no exposures are met with anywhere. The following are the minerals met with in the region :

Brick clays : Brick clays are won from banks of Arasalar about 1.6 km. almost south-west of Pudutturai over an area of 0.6 sq.km. Clayey soils are also employed for making bricks near Mel Kasakkudi, Nedungadu, Ambagarattur and Vadamattam. Indicated reserves of 1.3 million tonnes have been computed, of which the padugai lands along the Arasalar will account for 0.83 million tonnes.

Kankar : About 0.4 km. in a northerly direction from Mel_Subbarayapuram village, small amounts of pisolitic kankar are found. It is obtained from a depth of about 1.2 km.

Sea Shells : Sea-shells collected from the coast are made use of in making lime for local use. Lime kilns were observed to the west of Karaikal town, near T.R.Pattinam and Akkaravattam.

Limonite and garnet sands : Limonite and garnet occur in varying concentrations in the beach sands along the Karaikal coast over a stretch of about 10 km. and varying in width from 20 to 100 m.

Oil : It may not be out of place to mention about the prospecting for oil going on in the area, as a result of the favourable structures and thick sediments deciphered first by the geophysical division of the Geological Survey of India, and later on by the Oil and Natural Gas Commission.

1.4 FOREST:

There is no Forest in Karaikal Region.

Old Time Industries : In 1648, Karaikal was famous for the special quality guingams (ie. white cloth with small red stripes). These guingams were brought to Pondicherry from where they were exported to Manila. Hence the name Guingam Manila.

Some interesting details about the old time industries in Karaikal are available to us from a report prepared by Cordier, a naval Captain, in reply to a detailed questionnaire received from the Ministere de la Marine. According to this report there were 26 pottery units in Karaikal engaged in the manufacture of utensils, flower pots, water jugs etc. Some of the units also produced tiles in their kilns. In the year, 1823, as many as 100 brick kilns and 71 brick makers were counted. The same report revealed the existence of 35 oil mills manufacturing coconut oil, gingili oil, besides producing oil from elipe (*bassia longifolia*) and laurel seeds. Of the three soap units, two were located in Karaikal and the other in Tirumalarajanpatinam.

The three coir manufacturers in Karaikal engaged lascars or coolies according to the type of coir to be manufactured. They used six different types of looms for the purpose. The work was carried out generally between January and October every year.

Industrial profile of Karaikkal

Karaikal is a good fishing centre with the following ten marine fishing villages spread along the coast. They are Mandabathur, Kalikuppam, Akkampettai, Kottucherry, Kasakudymedu, in Karaikal municipal area, Kilinjalmedu, Karaikalmedu, in Tirumalairayam Pathinam commune, Karakalchery in Neravy commune, Keezhaiyur Pattinaccherry and North vanjore.

Fresh and dried fish are exported powers are also exported. Good quality chanks (conch shells) are also available here in the sea of Karaikal.

The only large scale industry in this district is a textile unit name M/s Soundararaja Mills Ltd, located in Nedungadu. Handloom weaving is also prevalent units too. There is an industrial training institute located in Tirumalairayam Pathinam.

Karaikal Port is poised to be a multi-cargo handling terminal. So far the port has handled cargoes such as Coal, Pet coke, Raw sugar, Fertilizer, Cement, Project Cargo and construction materials. Containers and liquid cargo are soon to follow. On completion, the port will be capable of handling all types of cargo. Karaikal Port is also a hub for oil exploration activities and OSV/PSVs belonging to companies such as Hindustan Oil Exploration Company (HOEC) and Reliance Petroleum regularly call at the port.

Karaikal Port is a deep draft, all weather port. The current depth of 14.5 m allows for handling of Gearless Panamax size vessels (up to 80000 MT). The final depth of 16.5 m will allow cape size vessels (up to 120000 MT) to call at the port. The lagoon type basin protected by breakwaters allows operations all around the year.

Karaikal Port received its first Gearless Panamax [3] vessel in November, 2009 and became the first Commercial port on Tamil Nadu coast to do so. The port also has the distinction of being the only private port to export cargo belonging to power equipment major Bharat Heavy Electricals Ltd (BHEL), which is a government agency.

The port obtained rail connectivity in January 2010 [5] and its 3 railway sidings are connected to Trichy via Nagore. Karaikal Port regularly dispatches 4-5 rakes of coal as well as Fertilizer everyday.
