PROJECT PROFILE ON CRUSHED GRANITE STONE

Product :: Crushed Granite Stone

NIC Code (2004) :: 14106

Product Code (Based on ASICC - 2000) :: 21157

Production Capacity :: 5000 units per annum (1 unit 200 cft.)
Value Rs.140 lakhs

Month & Year of preparation :: December, 2010

Prepared by :: Glass & Ceramics Dvn.,
MSME-Development Institute,
Balanagar, Narasapur Cross Roads,
Hyderabad – 500 037

Introduction:
Crushed stone is also known as metal jelly. Crushed stone is segregated into various sizes viz. 35mm, 20mm, 12mm etc. for different uses. Crushed stone aggregates are used for construction of roads, bridges, housing, industrial building construction and other cement based products like RCC pipes, PSC poles, pre-moulded slabs, frames and beams etc. for fabrication.

**Plant Capacity per annum**: 6250 units per annum
Approx. value: Rs.140 lakhs

**Market & Demand**: Housing is a basic need of the society. Hence it is receiving increased focus and support from the Government whether it is housing or industrial construction activities, all building constructions requires crushed stone. Crushed stone is also required for cement based products like RCC pipes, PSC poles, cement concrete slabs, well rings, window and door frames and road laying. Demand for crushed stone will continue to grow with the growth of its user industry.

**Raw Materials**: Raw materials required for this project is granite stone boulders of various sizes 6250 units per annum.

**Technical Aspects:**
**Manufacturing Process**: It is advantageous if the crushed stone unit is set up near the queries where the granite boulders of various sizes are available for the crushing unit. The wastage from the granite industry will be of much use to the crushed stone unit. The granite stones of various sizes are fed into the jaw crushers for size reduction. Depending on the desired output size of the crushed stone, the raw materials may be fed to one or two jaw crushers in a sequence. Then these crushed stones are passed on to the rotary screen for size gradation. Material is handled through a belt conveyor to the different places of operation.

**Basis & Presumptions**:  
1. The production has been calculated on the basis of single shift of 8 hours and 300 working days in a year.  
2. The full production capacity presumed to be achieved in the 2nd year of operation.  
3. Labor wages has been considered basing on market rates but not less than the rates prescribed by the Govt. at the locality.  
4. The interest rate on an average has been taken on 15% on capital investment.
5. The entrepreneur is presumed to arrange 25% of the project cost as margin money.
6. An average plant life of 10 years has been taken into consideration. The unit is supposed to repay the installment of interest after the first year of completion.
7. The cost of machinery and equipment has been taken based on prevailing market rates.

**Production capacity:**
5000 units per annum (1 unit 200cft.)
Approximate power requirement 92 HP

**Utilities:**

**b) Raw Materials:**

Granite stone boulders of various sizes 625 units @ Rs.1000/- per unit  
**6,25,000**

**d. Other Contingent Expenses:**

i. Repairs, maintenance and replacement  
ii. Office expenditure  
iii. Insurance  
iv. Telephone  
v. Transport  
vi. Sales expenses  
vii. Miscellaneous expenses  
**43,000**

Total recurring expenditure per month  
**a+b+c+d**  
**8,05,000**

Total working capital for 3 months  
**24,15,000**

**Quality Control and Standards:**

There are no Indian Standard specifications for the quality of crushed granite stone. However, crushed stone is graded into different sizes viz. over 35mm, 20mm, 12mm etc. for different uses.

**Pollution Control:**

Lot of fine dust emerges out at the time of crushing operation. Suitable dust collection is required to be installed with extension pipes etc.

**Total Capital Investment:**

a. Fixed Cost  
**31,85,000**

b. Working Capital for 3 months.  
**24,15,000**

**TOTAL:**  
**66,00,000**

**Machinery Utilization:**
80% of utilization has been taken into consideration on all the machinery.

**Financial Analysis:**

1. **Cost of Production per annum:**
   a. Total recurring cost  
   b. Depreciation on building 5%  
   c. Depreciation on machinery & equipments 10%  
   d. Interest on total capital investment @ 15%  
   **TOTAL:**

<table>
<thead>
<tr>
<th>Description</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total recurring cost</td>
<td>96,60,000</td>
</tr>
<tr>
<td>Depreciation on building 5%</td>
<td>22,500</td>
</tr>
<tr>
<td>Depreciation on machinery &amp; equipments 10%</td>
<td>1,45,000</td>
</tr>
<tr>
<td>Interest on total capital investment @ 15%</td>
<td>9,90,000</td>
</tr>
<tr>
<td><strong>TOTAL:</strong></td>
<td><strong>1,08,17,500</strong></td>
</tr>
</tbody>
</table>

**Turnover per year:**
5000 units of various sizes of crushed granite stone @ Rs.2,800 per unit (on an average)  

<table>
<thead>
<tr>
<th>Description</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Turnover per year:</strong></td>
<td><strong>1,40,00,000</strong></td>
</tr>
</tbody>
</table>

**Net profit per year**

\[
\text{Net profit per year} = \text{Turnover per year} - \text{Total Cost of Production per annum}
\]

\[
1,40,00,000 - 10,81,750 = 31,82,500
\]

**Net Profit Ratio:**

\[
\text{Net Profit Ratio} = \frac{\text{Net profit per year}}{\text{Turnover per year}} 
\]

\[
23\%
\]

**Break Even Point:**

**Fixed Cost:**

- Total Depreciation  
- Interest on total capital investment  
- 40% of personnel expenditure  
- 40% of utilities  
- 40% of other contingent expenditure  

**Total fixed cost:**

\[
20,21,500
\]

**Rate of return:**

48%

**Break Even Point:**

\[
\text{Fixed Cost X 100} / \left( \text{Fixed Cost} + \text{Profit} \right) = 40\%
\]

\[
\frac{20,21,500 \times 100}{52,04,000} = 40\%
\]
Suppliers of machinery and equipment:

1. Hearty and Greasham (India) Ltd., Indian Chambers building, Esplanade, Madras - 1.
5. Arnic Industries Pvt. Ltd., 10 BT Road, Belghoria, Calcutta-56.
7. Kirloskar Brothers Ltd., 7/3, Pattilor Road, Chennai-2.

Suppliers of raw materials: Either from own quarries or material purchase from APMDC.

Resource centre of Technology : Technical guidance that would be provided by the machinery suppliers would be adequate for this product.
