Brief Industrial Profile of –PILIBHIT- District

1. General Characteristics of the District-

In 1801 when Rohilkhand was ceded to the British Pilibhit was a Pargana of The District Of Bareilly, which lost it in 1833, the arrangement being temporary and the tract being again united with Bareilly in 1841. In 1871 was formed the Pilibhit subdivision comprising Jahanabad, Pilibhit and Puranpur which was eventually converted into a separate District in 1879. At the introduction of the British rule the parganas of Pilibhit, Jahanabad & Bisalpur was formed into separate Tehsils. Puranpur was united for this purpose with Khutar. A redistribution of the area was effected in 1824, when the Bisalpur Tehsil contained the Parganas of Bisalpur and Maurari, which afterwards become a single area; Jahanabad was joined with Richha to form tehsil Pareva & Pilibhit with Bilheri, the HQ being at Pilibhit. In 1851 Bilheri and the other *tarai* pargana were taken under direct management and in 1863 Richha was attached to the new Baheri Tehsil, Pargana Jahanabad being assigned to Pilibhit which also received Puranpur on its transfer in 1865. The latter, in 1871, became subtehsil dependent on Pilibhit. The promotion of Puranpur into a full Tehsil occurred in 1879, while Bisalpur throughout remained a separate subdivision. Thus the area is now divided into three Tehsils and four Parganas. Puranpur & Bisalpur constituting individual Tehsils and Parganas & the Tehsil of Pilibhit comprising the parganas of Pilibhit and Jahanabad.

1.1 Location & Geographical Area.

The district of Pilibhit is the north-eastern most district of Rohilkhand division which is situated in the sub Himalayan belt on the boundary of Nepal. It lies between the parallels of 28°6' and 28°53' north latitude and the meridians of 79°57' and 80°27' east longitude. On the north are the district Udham Singh Nagar and the territory of Nepal, on the south lies the Shahjahanpur district, on the east the district is flanked for a short distance by district Kheri and for the remaining distance by the Shahjahanpur district and on the west the district of Bareilly.

According to the central statistical organization the District Pilibhit had an area of 3765.4sq.km. on July 1, 1971, occupying 49th position in the state. Major part of Pilibhit District is covered by dense forest. Total 80009 hectare is forest.

1.2 Topography

In its general appearance the district presents diverse features and topographically may be divided into several distinct tracts. In the north and north-west the tract is a continuation of the *Terai*. The southern portion of the Bisalpur Tehsil is similar in most respect to the adjacent tract of Bareilly and Shahjahanpur. The eastern and smaller section approximates rather to undeveloped forest areas of Khiri, though with the spread

of cultivation the dissimilarity between Puranpur and the rest of the district is gradually becoming less marked.

1.3 Availability of Minerals.

There is No Minerals Available in the district

1.4 FOREST

The District covers 78639 Hectare area for the Forest

1.5 Administrative set up.

For administrative convenience, the district of Pilibhit has been divided into three tehsils namely,

1. Pilibhit
2. Bilaspur
3. Puranpur

These tehsils are further divided into 7 blocks.
