## **Brief Industrial Profile of BEGUSARAI District**

### **1. General Characteristics of the District**

**Begusarai is one of the thirty-eight districts in the state of Bihar. The district lies on the northern bank of the Ganga river. As an old saying, the name of the district apparently comes from “Begum”(queen) and “Sarai” (inn). The Begum of Bhagalpur used to visit “Simaria Ghat” ( holy place on the banks of the Ganges ) for a month of pilgrimage , which later took to the slang of Begusarai. Begusarai was established in 1870 as a subdivision of Munger District. In 1972, it was given district status .**

## **1.1 Location & Geographical Area.**

**Begusarai district occupies an area of 1918 square kilometer . The district lies on the northen bank of river Ganges . The Begusarai district is a part of Darbhanga division. It is located at latitudes 25 degree 15 minute NORTH to 25 degree 45 minute NORTH and longitude 85 degree 45 minute EAST to 86 degree 36 minute EAST.It is bounded on thenorth by Samastipur , on the south by the Ganga and the lakhisarai district, on the east by Khagaria and Munger and on the west by Samastipur and Patna district.Begusarai is the part of Darbhanga Division.**

•

## 1.2 Topography

District Begusarai lies in the middle part of the NORTH GANGA PLAIN. In general, it is low flying flat terrain (MSL 45m-32m) having a southerly to southeasterly slope. This factor governs the flow of streams. Geomorphologically it is a part of the Gandak-Kosi interfluve. The southern part of the district, except those of low lying flood plains of Ganga, appears to be elevated landmass when

compared to the adjoining district of Khagaria and Samastipur. Hence, being a safer destination amidst the flood

Drained region , it support the human activity in a better way.The district is drained by number of rivers viz. Ganga , Burhi Gandak, Bagmati and Balan rivers and in addition , small rivulets , dhars ,nalas which are originated locally and preserve rain water, mark the landscape.
