Brief Industrial Profile of Pithoragarh District

1. General Characteristics of the District

Pellentesque Mother Nature has been rather generous in the distribution of a very rich hydrographic features of irresistible beauty to district Pithoragarh traditionally held to be the chosen abode of the divine deities, cascading waterfalls, the splendid glaciers, natural reservoirs enclosed by fantastic variety of vegetation, serene lakes and noisy flamboyant rivers are all a part of the rugged charm that the district possesses to such a stupendous degree.

Once the bastion of the Chand rulers, Pithoragarh town is littered with temples and forts belonging to that era. The town is set in a valley popularly known as and lies in the centre of four hills Chandak, Dhvaj, Kumdar and Thal Kedar, and stretches in the southern flank to Jhulaghat demarcated by the Kali river adjoining the barren peaks of Nepal Hills. It is snuggled in the folds of four kots Bhatkot, Dunderkot, Udaikot and Unchakot.

Pithoragarh District having its entire northern and eastern boundaries being international, assumes a great strategic significance and, obviously, is a politically sensitive district along the northern frontier of India. Being the last district adjoining Tibet, it has tremendous strategic importance as the passes of Lipulekh, Kungribingri, Lampia Dhura, Lawe Dhura, Belcha and Keo, open out to Tibet. The breath taking beauty of Pithoragarh - Himalayas, wide expanses of grassy meadow, perennial streams roaring down the zig-zag course, a stupendous variety of flora and fauna, above all, pure nature yet unsullied, seem to beckon the beholder into their folds, into a charmed world of virgin beauty.

It was in the wake of the Chinese aggression that on the 24th Feb. 1960, a sizeable section of Almora district was carved into Pithoragarh district containing extreme border areas with its head quarters in Pithoragarh town. On 15th September 1997, the Champawat Tehsil, hitherto under Pithoragarh, was carved into Champawat district.

The details of the land utilization are given as below:
