**Uttarkashi District** is a district of Garhwal division of the Uttarakhand state in northern India, and has its headquarters at Uttarkashi city. It has six Tehsils named after Badkot, Bhatwadi, Chiniyalisaud, Dunda, Purola, Mori. The district is named after its headquarters town Uttarkashi, an ancient place with rich cultural heritage and as the name suggests is the Kashi of north (Uttara) held almost as high a veneration as Kashi of the plain (Varanasi). Both the Kashi of the plain (Varanasi) as well as the Kashi of north are situated on the banks of the river Ganga (Bhagirathi). The area which is held sacred and known as Uttarkashi, lies between the rivers Syalam Gad also known as the Varuna and Kaligad also known as the Asi. Uttarkashi District town lies high in the Himalaya range, and the district contains the source of both the Ganges and Yamuna rivers, which attract thousands of Hindu pilgrims. The town lies on the main route to Gangotri, has many Hindu temples, and is also considered an important Hindu pilgrimage centre.

The terrain and climate of Uttarkashi district provide uncongenial physical environment for human settlement. Yet undaunted by hazards and hardships this land was inhabited by hill tribes since ancient times bringing out the best in man his adaptive talents. The hill tribes namely Kiratas, Uttara Kurus, Khasas, Tanganas, Kunindas and Pratanganas find references in the Upayana Parva of Mahabharata. The land of Uttarkashi district has been held sacred by Indians since ages where the seers and sages had found solace and spiritual aspirations and performed penances and where devas performed their sacrifices and Vedic language was better known and spoken than elsewhere. People came here for learning Vedic language and speech.

## 1.1 Location & Geographical Area

### UTTARKASHI (Uttaranchal)

Uttarkashi district was created on February 24, 1960 out of what then constituted the parganas of Rawain and Uttarkashi of Rawain tahsil of erstwhile Tehri Garhwal district. It sprawls in the extreme north-west corner of the state over an area of 7951 sq. kms. Lying in the upper Himalayas, Uttarkashi contains within itself varying geographic environments ranging from snow free valleys and outer hills to the high peaks with perpetual snow and glaciers. The terrain runs into series of ridges and valleys. Each ridge leads to another coiling up in seemingly unending chains. Most of the terrain is mountainous consisting of high rise ridges, hills and plateaus and flat pieces of land are rare. The district is bounded on the north by Himachal Pradesh state, on the northeast by Tibet, on the east by Chamoli District, on the southeast by Rudraprayag District, on the south by Tehri Garhwal District, and on the west by Dehradun District. Jolly Grant Airport is the nearest Airport to Uttarkashi situated at a distance of 160 km. The nearest railway station to Uttarkashi is Rishikesh. Rishikesh railway station is situated 143 km before Uttarkashi on NH58. Rishikesh is well connected by railway networks with major destinations of India. Trains to Rishikesh are frequent. Uttarkashi is well connected by roads with Rishikesh. Taxis and buses are available from Rishikesh, Tehri Garhwal and many other destinations to Uttarkashi.

## 1.2 Topography

Latitude	: 30°43'N to 30°73'N
Longitude	: 78°27'E to 78°45'E
Geographical Area	: 7951 km <sup>2</sup>
Area under Forest	: 6996.9 km <sup>2</sup> (88% approx. of total area)
Canal Length	: 661 km
Temperature Range	: 35 °C to -1 °C
Average Normal Rainfall	: 1208.6 mm
Languages	: Hindi, English and Garhwali

## 1.3 Availability of Minerals

The knowledge regarding occurrences of minerals in the district is scanty. As per stray surveys, soap stones, iron, copper, graphite, lime stone, kyanite and mica deposits occur in the district. The revenue generated by major mineral and ores by the district were Rs 1,19,97,810 (2009-10) and Rs 2,07,49,409 (2010-11). (Source:- Geology & Mines Unit, DI, Dehradun)

## 1.4 Forest

The land in these areas is low in fertility due to large content of out crops of boulders and gravels. Made-up of alluvial soil, valley is a stream bed. Generally forests occur on the upper ridges that bound the valleys. On their sloping hill sides lie a chain of sparsely populated settlements interspersed with terrace cultivation. The widely varying climate and topography produce a wide range of vegetation and serve as habitats to diverse species of wild life. Forests occupy a place of pride in the environment of the district not only for the sheer bulk of the area they occupy but also for the richness of variety of vegetation. As much as 88 percent of the total area of the district is administered by the Forest Department. Pine forests occur between the altitude of 900-2000 metres, Deodar forests between 2000-3000 metres, Fir and Spruce forests over 3000 metres and Kharshu, Birch and Junipers forests upto the height of 4000 metres. Above the Fir and Spruce forest zone, alpine pastures are found throughout the district between the heights of 3500 metres to 4877 metres above sea level. Rich varieties of grass, shrubs and herbs come up during June-September while during the remaining part of the year these areas remain covered with snow. A large number of medicinal plants of great commercial value grow spontaneously in the forests. Some of these grow in the valleys; some in sub-montane tracts while some other on higher altitudes. Forestry too does play an important role in

the economy of the district. It employs persons both in preservation and propagation of forests as well as in their exploitation. Herbs are the most important minor forest produce. A large variety of herbs grow wild.

### **Constraints**

- Week Communications Network
- Infrastructure
- Connectivity
- Lack of Entrepreneurship
- Shortage of skilled manpower
- Transportation
- Marketing
- Technology
- Fragmentation if Land holding
- Absence of integrated marketing infrastructure (packaging, weighting, collection centers, etc)
- Lack of information / awareness about various schemes.
- Non-availability of training facilities in internal locations.
- Shortage of Bank Credit.

### **Suggestions**

1. The district has huge potential in horticulture and vegetables products.
2. Proper supply chain infrastructure is needed for development of these sectors.
3. In absence of proper transmission lines, the potential for growth of small hydro-dams is not taking place which needs to be put in place.
4. The district also has potential for adventure tourism, the same needs to be exploited.
