Brief Industrial Profile of Thane District

1. General Characteristics of the District.

Thane is the third Most industrialized district in the State. The Thane Belapur-Kalyan industrial belt is the Centre of highly sophisticated modern industries. The industrial growth in the district, however, is concentrated in this industrial belt. The district can be divided into three district parts. The first is the area under direct influence of Mumbai metropolis. This area is more or less suburban to the metropolis and includes Thane, Kalyan and Ulhasnagar talukas where a number of organized modern industries are concentrated . the second zone comprises the industrially developing areas of Vasai, Bhiwandi, Palghar and Dahanu. The third part includes the rest of the area of the district having conventional village industries, age-old cottage industries and primary processing agro-industries.

1.1. Location and geographical Area.

Thane, the northern-most district of Konkar, lies adjoining the Arabian Sea in the north0-west of Maharashtra States. It extends between 18*42' and 20*20' north latitude and 72*45' and 73*48' east longitude. Its northern limits adjoin the Union territories of Dadra, Nagar Haveli and the State of Gujarat while the district of Nasik and Ahmednagar to its east, Pune to the South –East, Raigad to the south and Mumbai Metropolitan to the South – West.

The total geographical area of the district is 9558 Sq. KMS which is 3.11% of the total Maharashtra area.

1.2 TOPOGRAPHY

Topographically, district can be divided into 3 parts:-

- (1) In the Eastern Part of the district, Sahyadri ranges are spread and its north side the thick forest area is situated.
- (2) The Central Region of the district is mostly flat area and Rice farming is done in this area.
- (3) In the coastal part and 15 to 20 Kms, its nearly area cultivated for Vegetables, Fruits and high quality of grass.

1.3 Avaibility of Minerals.

There is no major mineral or mining in the district. However, the mining activities in the district are contfined to quarrying of stones and sand which is carried on especially at places which are near urban areas in Kalyan, Bhiwandi and Thane Tehsils. Deposits of reddish laterite clay are also found near Gokhivara in Vasai Tehsil. The clay is used for making bricks, tiles and cheap red glazed wares.

1.4 FOREST

The total area under forest in the district is 3463 Sq. Kms which is 37.10% of total geographical area. Out of this total forest area, 80.51% area is spread in Shahapur, Palghar, Jawhar, Wada, Murbad, Dahanu and Vasai talukas and in remaining talukas it is spread only 19.49%

3.10 Potential for new MSME

Taking into consideration the availability of resources, infrastrural facilities, manpower and demand for various products both within as well as outside districts, the following candidate industries are suggested. These candidate industries can be divided into three categories:-

- i) Resource based Industries
- ii) Demand based Industries
- iii) Ancillary Industries

I) Resource based Industries:

These Industries can be divided into following group:-

- A) Agro based
- B) Forest based
- C) Minerals based
