Brief Industrial Profile of Thanjavur District

1. General Characteristics of the District

Thanjavur District is the Rice Bowl of Tamil Nadu. The district stands unique from time immemorial for its agricultural activities and is rightly acclaimed as the Granary of the South India.

The Big Temple and other famous temples in Kumbakonam and Darasuram in the district are known all over the world. Thanjavur was the cultural capital of the country in during the Eighteenth century. Thanjavur gained prominence during the period of Chola Kings, who made it as their capital. Thereafter, it was ruled by Nayaks and Maratta Kings, who nurtured art and culture. The cultural, the architectural and the scholarly pursuits of these rulers are reflected in the great monuments like Grand Anaicut, Big Temple and Serfoji Mahal Library etc. in the district.

1.1. Location and Geographical Area

Thanjavur District is located in the eastern coast of Tamilnadu. Erstwhile composite district of Thanjavur was bifurcated into Thanjavur and Nagapattinam Districts with effect from 18.10.1991. Again in April 1997, when Tiruvarur district was formed by bifurcating Nagapattinam District, part of Thanjavur area, namely the Valangaiman block had been merged with the newly formed Tiruvarur District. Thus the present Thanjavur District was formed with a geographical area of 3396.57 Sq. Kms divided into 14 blocks. The area constitutes just 2.6 % of the area of the State. It lies

The district boundaries are:

East : Nagapattinam and Tiruvarur Districts.

West : Tiruchy & Pudukottai districts.

North : River Coleroon separating Tiruchy and Perambalur districts.

South: Palk Strait and Pudukottai district.

The district lies between 9.50' & 11.25' degrees of northern latitude and 78.45' and 79.25' degrees of eastern longitude.

1.2 Topography:

The climate of the district is tropical in nature. Temperature, in the district, varies between 20.29 and 38.42 Degree C. The normal rainfall in this district is around 1020 mm, mainly through the north east monsoon (October to early December).

Alluvial soil in the Cauvery delta and Sandy soil in Coastal area are the predominant soil types. The soil type, the climate and rainfall best suit the paddy crop and so the district stands as the rice bowl of Tamilnadu since ancient days. Cauvery, Vennar and Grand Anaicut canals are the major water sources in this district.

1.3. Availability of Minerals

Laterite, sandstone and Kankar have been found in Thanjavur district. Quartz crystals rolled into pebbles were also found. Iron ore, Laterite and sandstone are found nearby Vallam.

Kankar and limestone occur under red soil. Laterite, ranging in the thickness from 0.3 to 1.0 metre., is available near Grand Anaicut and Thirumalaisamudram. The thickness of Kankar in Thirumalaisamudram area ranges from 2.0 to 2.5 metre and the total reserves have been estimated to be about 0.5 million tonnes. Kankar is of good quality, coal ranging from 48.42 percent to 52.72 percent and low in Magnesia.

So far no mining is carried out in this district. The district has potential for industries based on these mineral resources.

1.4 Forests:

The district possesses 3426 hectares of land under forest constituting 1.01% of its geographical area and a meager 0.18 % of the forest area of the state. Timber and Cashew (1400 kg) are the forest produce available.

1.5 Administrative set up.

The district has been divided in to 3 revenue divisions and 8 taluks. The area has been further divided as follows for revenue administration.
