# Brief Industrial Profile of Theni District

## 1. General Characteristics of the District:

The district is bounded by Dindigul District to the north, Madurai District to the east, Virudhunagar District to the southwest, and Idukki district of the Kerala State to the west. A range of hills which runs parallel to Western Ghats from north to south separate it from the neighboring state of Kerala. Theni District is divided into two natural divisions: The hilly areas constituted by parts of the three taluks Periyakulam, Uthamapalayam and Andipatti with thick vegetation and perennial streams from the hills on the western side and Cumbum valley which lies in Uthamapalayam taluk.

### 1.1 Location & Geographical Area.

The district lies between 90° 53' and 100° 22' north latitude and 770° 17' and 770° 67' east longitude. The general geographical information of the district is hill area. Vaigai River is flowing in the district and it will normally be dry during the summer season. The 2,889 km<sup>2</sup> (1,115 sq mi) district lies at the foot of the Western Ghats between 9° 39' and 10° 30' North latitude and between 77° 00' and 78° 30' of East Longitude. Central location: 10°04'N 77°45'E.

### Topography:

Theni district consists of Five taluks, namely 1. Theni, 2. Periyakulam, 3. Andipatti, and 4. Uthamapalayam and 5. Bodinaickanu. Theni district comprises 5 Taluks, 8 Blocks and 183 Villages. As regards the hierarchy of administrative arrangement, there are 5 Municipalities, 23 Town panchayats and 130 Village panchayats in the district.

Red loam soil is the predominant Soil type in this district accounting for 37.48% followed by red sandy soil of 14.53%. The other types of soils are lateritic soil, black soil, and sandy soil.

### **Economic Features**

Agriculture, Industry and Trade play an important Role for its economic developmental activities. Principal crops like Paddy, Sugarcane, Cotton, Coconut, Groundnut and various kinds of fruits and vegetables are being cultivated in this District.

Cotton Spinning Mills, Sugar Mills are the major industries in this District. In Aundipatti Taluk Handloom weaving and power looms are also flourishing. In Uthamapalayam Taluk, "Highwavis Estate" plays an important role in the production of Tea.

Three Hydro Power Station Projects namely, Periyar, Surliyar and Vaigai Micro Hydro Power Station generate Electricity in this District

## **Graph processing – Beverages**

Cumbum Valley is a major centre for grape production with 4,000 small farmers producing over 90,000 tonnes of Muscat grapes; know locally as "paneer dhvakshai" and about 10,000 tonnes of Thomson seedless grapes. The unique feature here is that the grapes are harvested throughout the year, while in most grape growing centres elsewhere the season ends with summer.

Institutions like the Central Food Technology Research Institute, Mysore, have tested the suitability of the grapes for processing to wine.

### **Wind Mills Opportunities:**

With high potential for wind power generation and availability of large tracts of open land and an excellent climate, several new companies, including foreign wind power units, have been thronging the district for setting up of windmills.

The total number of functioning windmills now has gone up to 210, which was just 85 in May 2010. Gandamanur, Rasingapuram, Kamatchipuram and Andipatti are some potential pockets in the district that already have several clusters of wind power turbines.

Besides, 40 wind power turbines were commissioned and waiting for grid connectivity. Proposals had also been sent to the Government for commissioning of many more new turbines in the months to come.

The Spain-based wind turbine manufacturer had been developing large scale wind farms swiftly in Theni, besides Coimbatore, said TNEB officials.

At the same time, power generation through wind turbines has also been increasing sizably with sudden increase in flow and velocity of the wind from the Western Ghats this season.

At present, wind power generating turbines have been generating 100 MW a day. However, the power generation touched its peak of 160 MW in some days.

With poor hydel power generation at the Lower Camp near Goodalur, the wind energy has been balancing the loss of power generation through the hydel power.

But wind energy experts said that 10 square metre of land will suffice to set up one unit. Besides, power lines and towers too will occupy only a small portion of land.
