Brief Industrial Profile of Shahdol District

1. General Characteristics of the District

Shahdol District is a district of Madhya Pradesh state in central India. With a total area of 5,671 square kilometers. Shahdol is an important district of Madhya Pradesh. The town of Shahdol is the district headquarters. The district is also a Division. Some of the districts in this division are Annupur and Umaria.

The Virateshwar Temple in Sohagpur Vangana is the most important tourist destination of Shahdol and a structural masterpiece. The district extends 110 km from east to west and 170 km from north to south. The etymology of the name as ascertained from the local residents points to its derivation from the name of the one Shahdolwa Ahir of Sohagpur village. The progenitor of the Ex-Illakadar family of Sohagpur, Jamni Bhan was the second son of Maharaja Virbhan Singh of Bagelkhand. He decided to settle at Sohagpur and assured maximum facilities to settler around, and also declared that places settled by clearing forests will be named after the pioneer settlers. Shahdolwa Ahir is believed to have settled the former village of Shahdolwa, about 2.5 km. from the headquarters of Sohagpur after this declaration. Later on, the place used to be the camp site for the Maharaja of Rewa and British officers on tour. More villages were grouped into the village of Shahdol as it grew to a town. The District Headquarters was shifted from Umaria to Shahdol after the merger of princely states took place in 1947

1.1 Location & Geographical Area.

Shahdol District is situated in the northeastern part of the Madhya Pradesh provinces of India. Because of the division of the district on 15-08-2003, the area of the district remains 5671 km². It is surrounded by Anuppur in the southeast, Satna & Sidhi in the north and Umaria in the west. The district extends 110 km from east to west and 170 km from north to south. This district is situated between 22°38' N latitude to 24°20' N latitude and 30°28' E Longitude to 82°12' E longitude.

1.2 Topography

The District is located in the north-eastern part of the Deccan Plateau. It lies at the tri junction of Maikal Ranges of the Satpura Range, the foot of the Kymore Range an extension of the Vindhya Range and a mass of parallel hills which extend over the Chhota Nagpur plateau in Jharkhand. In between these hill ranges lies the narrow valley of the Son and its tributaries. Since the Kymore Range extends along the Son just across the northern boundary, the District may be divided into three physiographic divisions. They are:-

- The Maikal Range
- The Hills of Eastern Plateau
- The Upper Son Valley

1.3 Availability of Minerals

District Shahdol is very rich in its mineral resources. Minerals found in district are coal, fire clay, ocher's and marble. Sohagpur Coal field contributes a major part in the revenue of the state. A brief description of the various occurrences is given below:

Coal: The important coal field in the District is Sohagpur coal field. The Baraka's in this area are about 3100 km² four coal seams have been recorded from the lower Baraka's whereas a few thin seams are reported from Upper Baraka's. The Lower Baraka coal of lower ash content and better quality as compared to that from Upper Baraka's. In general the coal is of low rank, high moisture, high volatiles and non-coking type. A reserve of 4064 million tonnes has been estimated from this field.

Clay: Good plastic clay deposits occur near Jamuni and Hinota.

Ochers: Ochers deposit in the Shahdol district is reported from pachdi.

Marble: Marble deposits are found near villages Pasgarhi, Bagdari and Paparedi. Details of the deposit to be under search in these area
