Brief Industrial Profile of Visakhapatnam District

1. General Characteristics of the District-

Visakhapatnam District is one of the North Eastern Coastal districts of Andhra Pradesh and it lies between 17° - 15' and 18°-32' Northern latitude and 83° - 54' and 83° - 30' in Eastern longitude. It is bounded on the North partly by the Orissa State and partly by Vizianagaram District, on the South by East Godavari District, on the West by Orissa State and on the East by Bay of Bengal.

1.1 Location & Geographical Area.

The District presents two distinct Geographic divisions. The strip of the land along the coast and the interior called the plains division and hilly area of the Eastern Ghats flanking it on the North and West called the Agency Division. The Agency Division consists of the hilly regions covered by the Eastern Ghats with an altitude of about 900 metres dotted by several peaks exceeding 1200 metres. Sankaram Forest block topping with 1615 metres embraces the Mandals of Paderu, G. Madugula, Pedabayalu, Munchingput, Hukumpeta, Dumbriguda, Araku Valley, Ananthagiri, Chinthapalli, G.K. Veedhi, and Koyyuru erstwhile Paderu, Araku Valley and Chinthapalli taluks in entirety. Machkhand River which on reflow becomes Sileru, drains and waters the area in its flow and reflow and is tapped for Power Generation. The other division is the plains division with altitude nowhere exceeding 75 metres watered and drained by Sarada, Varaha and Thandava Rivers and rivulets Meghadrigedda and Gambheeramgedda. Since no major Irrigation system exists significant sub regional agronomic variations exist in this division. Along the shore lies a series of salt and sandy swamps. The coast line is broken by a number of bald head lands, the important of them being the Dolphin's Nose which had afforded the establishment of Natural Harbour at Visakhapatnam, Rushikonda(v) Polavaram Rock and the big Narasimha Hill at Bheemunipatnam. Administratively, the District is divided into 3 Revenue Divisions and 43 Mandals.

The Geographical area of the District is 11161 Sq. KM. which is only 4.1% of the area of the State.

1.2 Topography –

Continuous echosounding surveys have been carried out along sixteen profiles covering the entire continental shelf between Bheemunipatnam and Kutukonda. Over the inner shelf and mid-shelf the bottom topography is smooth and featureless. Between 70 m water depth and the continental shelfedge several interesting topographic features such as Terraces, Karstic structures associated with pinnacles and troughs and smooth dome shaped reef structures are recorded. The nature of these features and the composition of sediments of this area suggest that they represent the ancient beaches formed during the lower sea levels of pleistocene

1.5 Administrative set up.

Visakhapatnam is one of the earliest municipalities along with Nellore, Kurnool, vizianagaram and Bhimilipatnam. Voluntary Municipal Association was set up in Visakhapatnam in the year 1858 under All India Act. XXVI of 1850. With the advent of Town Improvement Act of Madras (Act. 10 of 1865). Substantial changes were occurred and the Voluntary Municipal Association had become a Municipality having a commission consisting of Officials and nominated mercantile community. Subsequently vide Madras District Municipalities Act 1884 the Commission was designated as Council.

The Constitutionals and Administrative set up of the Vizag Municipality set forth by the Madras District Municipalities Act.1920 and the Amendment Act 1933 remained unchanged without any significant changes until 1965 when the Andhra Pradesh Legislature passed the Andhra Pradesh Municipalities Act 1965.
