DISTRICT INDUSTRIAL PROFILE OF DADRA & NAGAR HAVELI

1. General Characteristics of the District

1.1 Location & Geographical Area

The Union Territory comprises two distinct geographical units - Dadra and Nagar Haveli. It is situated on the Western coast of India between the parallels of 20° – 0' and 20° – 25' of latitude North and between the meridian 72° – 50' and 73° – 15' of longitude East. It occupies an area of 491 square kilometres (190 sq mi)-comparatively equivalent to the Phillippines' Biliran Island. It ranks 4th among the Union Territories and 32nd including the states. The territory is surrounded by Valsad District of Gujarat on the West, North and East and by Thana District of Maharashtra on the South and South-East.

1.2 Topography

The stretch of the geographical area is hilly terrain especially towards the north east and east where it is surrounded by ranges of Sahyadri Mountains (Western Ghats). The central region of the land is almost plain and the soil is fertile and rich. The river Damanganga rises in the Ghat 64 km from the western coast and discharges itself in the Arabian Sea at the port of Daman after crossing Dadra and Nagar Haveli. Its three tributaries viz. Varna, Pipri and Sakartond join Daman Ganga within the territory. About 43% of the land is under forest cover. However the reserved forest cover is about 20,359 hectares (50,310 acres) in this territory constitutes about 40% of the total geographical area. The protected forests constitute 2.45% of the total land area. According to the satellite data taken in the year 2008, UT has roughly about 114 square kilometers (28,000 acres) of moderately dense forest and 94 square kilometers (23,000 acres) open forest. As per Forest Survey of India, DNH has two major forest types viz. Tropical Moist Deciduous forest and Tropical Dry Deciduous forest. The major produce is Khairwood and timber. Teak, Sandra, Khair, Mahara and Sisam are the major tree species in the region. Tree Cover has been estimated around 27 square kilometers (6,700 acres) from the six year data (2002–08), which is around 5.5% of the

total geographical area of DNH. The rich bio-diversity makes it an ideal habitat for a variety of birds and animals. This makes it a perfect spot for eco-tourism. Silvassa is an incredible eco-tourism spot for wildlife enthusiasts. The climate of Dadra and Nagar Haveli is typical of its type. Being situated near the coast, it has maritime climatic conditions. The summers are hot and humid with temperatures reaching as high as 39° in the month of May. The monsoon starts in the month of June and extends till September and is equally humid. The rainfall is brought by South West monsoon winds. It is known as the Cherrapunji of the western India receiving annual rainfall of about 200–250 cm. Winters are generally pleasant with temperatures ranging from 14° to 30°.

2.1. HISTORY OF INDUSTRIALISATION

BEFORE 1965, THERE WAS NO INDUSTRIAL UNIT, SMALL SCALE OF COTTAGE INDUSTRIES EXISTING IN THE UNION TERRITORY OF DADRA AND NAGAR HAVELI. HOWEVER, FEW CRAFTSMEN USED TO WORK TRADITIONALLY FOR MANUFACTURING OF EARTHEN POT, LEATHER ITEMS CHAPELS AND SHOES, ETC. AND OTHER ITEMS MADE FROM BAMBOOS. THE SKILL WAS AVAILABLE ONLY WITH LIMITED PERSONS IN SOME OF THE VILLAGES AND IT WAS EXPLOITED COMMERCIALY.

THE INDUSTRIAL DEVELOPMENT STARTED ON A LOW KEY DURING THE YEAR 1965 BY ESTABLISHING ONE INDUSTRIAL ESTATE UNDER COOPERATIVE SECTOR IN THE YEAR 1965 NAMELY M/S. DAN UDYOG SAHAKARI SANGH LTD. THE GOVERNMENT DEVELOPED THREE INDUSTRIES ESTATE IN THE TERRITORY IN DIFFERENT POCKETS VIZ
