Brief Industrial Profile of Hyderabad District

General Characteristics of the District

1.1 Location & Geographical Area.

The district is located at 17° 22' N latitude and 78° 27'E longitude. It is surrounded on all sides by Ranga Reddy district. The total geographic area of the district is 217 Sq. kms. The rural areas of erstwhile Hyderabad district now belong to Ranga Reddy district, which offers the capital city a great scope for expansion on all sides.

1.2 Topography

The city is situated on the Deccan Plateau, 1788' above sea level. The highest point in the city, the Banjara Hills, is 22060 above sea level. Contour level falls gradually from eastern part to western parts. The city has a rocky terrain.

1.3 Availability of Minerals.

The entire area under Hyderabad district is urban area, and as such no mining activity is undertaken.

2.	M/s. Hyderabad Constructions Co.Ltd., Hyderabad	Acetic Acid	2250	62

3.5 Major Exportable Item : Tobacco products

3.6 Growth Trend: In 2000-01, there were 20 Large/ Medium enterprises in Hyderabad district. This has reduced to just two L&M industries at present, as many industries have moved away from the city. New industries are banned in the city. Only non-polluting and service based industries are allowed. Even State PSUs like Allwyn Ltd, AP Scooters, Indian Drugs and Pharmaceuticals Limited (IDPL), Praga Tools etc have closed down. Over 6 Medium industries manufacturing edible oil have closed.

3.7 Vendorization/ Ancillarization: Many industries in Hyderabad and surrounding areas of Ranga Reddy district are engaged in the manufacture of high precision items required by the Defence establishments and other Hi- tech industries. The new Public Procurement Policy provides more scope for MSEs to supply goods and services

3.8 Medium Scale Enterprises:

The number of Medium scale enterprises established in Hyderabad since 2007-08 are as follows:

Year	No. of Medium scale enterprises established
2007-08	nil
2008-09	2
2009-10	1
2010-11	1
2011-12	2

3.8.1 Medium scale units established have been in the IT sector.

3.8.2 Major Exportable Item : Major exports from Medium scale sector are from the IT (Software,) industry. Exports from neighbouring district of RR district are from Pharma, Gems and Jewellery, engineering products, IT & ES products, pharmaceuticals, precision

tools, engineering products, garments, gems and jewelry, basmati rice, spices, software, edible oil etc

3.9 Service Enterprises

3.9.1 / 3.9.2 Potentials areas for service industry

Software development,
IT & ES services,
Computer training institutes,
Repairing & servicing of automobiles,
Mobile phones, electrical appliances,
Refrigerators & air coolers,
Consultancy services in the areas of marketing,
Technical consultancy,
Corporate training,
Soft skills training,
Media & advertising services,
Film editing and making,
Construction related activities, etc,

3.10 Potential for new MSMEs

Non polluting products like
Readymade garments,
electronics,
software,
services like repairing and maintenance of computers,
household appliances,
consultancy – marketing,
nursing homes,
professional services
stock broking and consultancy, etc
(Industries are banned in and around catchment areas in the district .)

A list of identified industrial activities for promotion in the district are detailed below:

4. Existing Clusters of Micro & Small Enterprise

4.1 DETAILS OF MAJOR CLUSTERS

4.1.1 Manufacturing Sector

Details of traditional clusters

Hyderabad is famous for its pearls, bangles, and zardosi work . All these products are hand made, by people who have been handed over the skills from past generations.

Clusters of artisans involved in these activities are concentrated in and around Charminar. The different traditional arts and crafts of the city are detailed below:

- a. Clay and Lac bangles: Lanes and by-lanes of Chudi Bazar near Charminar in Hyderabad house innumerable households engaged in the traditional art of bangle making. Stone studded bangles made of lac and clay, and glass bangles of different colours are world-renowned.
- b. Zari work on saris and dresses: Families in and around Charminar and Patel market do Kamdani, Gota and Zardosi works on saris, dresses, and other material. Applique work, mirror work, *chamki* work are also much sought after. The work done is of very high quality and requires great skill. Depending on the intricacy of the designs, the rate per saree ranges from Rs.200 to several thousands of rupees.
- c. Brass idol making work: Some families in Hyderabad still continue the traditional work . It is estimated that around 500 households in and around Charminar area are engaged in this activity. Though the products are sold in emporia in the city at very high prices, only a small percentage of it goes to the artisans.
- d. Block printing and tying & dyeing: Hyderabad is famous for tied and dyed saris and dress materials. This art is practiced by many families in the southern parts of the city.
- e. Silver foil: Perhaps the most unique skill, found only in Hyderabad is the making of silver foil to decorate sweets. It is understood that there are about 100 tiny units in and around Charminar engaged in this activity, which involves constant flattening, by hand, of small silver pellets.
- f. Leather shoes and chappals: The areas of Jiyaguda and Begum Bazar house upto 1000 families of traditional cobblers, who manufacture rubber and synthetic leather footwear. These are made on orders by traders, and only a part of the cost of the goods reaches the actual manufacturers.
- g. Leather tanning: There are a few leather tanning units in Musheerabad in the city. But this being a residential locality, pollution due to the tanneries is a major problem. Many of these tanneries have since been forced to shut down.

4.1.2 Service clusters: Hyderabad is a hub of IT industries which are in the Micro, Small and Medium sectors, and also large MNCs like Microsoft, Infosys, Wipro, Accenture etc. Many of these IT clusters border Hyderabad districts, but lie in RR district.

4.2 Details of Clusters

4.2.1 Name of the cluster: Plastic Cluster

1	Principal Products Manufactured in the Cluster	Injection moulded, blow moulded, extruded plastic products, pipe fittings, wires, cables, plastic toys, furniture, kitchenware, auto and electronic parts in plastics
2	Name of the SPV	Indian Institute of Foundrymen, Hyderabad Chapter
3	No. of functional units in the clusters	100
4	Turnover of the Clusters	□ 2000 million
5	Value of Exports from the Clusters	NA
6	Employment in Cluster	3000 persons
7	Average investment in plant & Machinery	NA
8	Major Issues / requirement	
9	Presence of capable institutions	CIPET, Cherlapally, Hyderabad
11	Problems & constraints	

4.2.2 Hyderabad leather cluster:

1	Principal Products Manufactured in the Cluster	Leather footwear, leather soles, uppers, garments, harnesses and saddles
2	Name of the SPV	
3	No. of functional units in the clusters	1530 units
4	Turnover of the Clusters	□ 10200 million
5	Value of Exports from the Clusters	NA
6	Employment in Cluster	20000 persons
7	Average investment in plant & Machinery	NA
8	Major Issues / requirement	The cluster units are stuck in a low end, low value added segment, most of the units are in unorganized sector, where workers are low

		paid, units work with low margins, and caught in a low productivity trap.
9	Presence of capable institutions	CIPET, Cherlapally, Hyderabad
11	Problems & constraints	Units employ manual labour, very low degree of mechanization exists, no product diversification has taken place

5. General issues raised by industry association during the course of meeting

Inadequate and irregular supply of power

High cost of land and other infrastructure

High VAT on certain goods.

High cost of land and sheds acting as deterrents to establishing new industries
