Brief Industrial profile of Phek District

1. General Characteristics of the District

Phek is a district in the southeastern part of Nagaland, bounded by Myanmar in the east, Zunheboto and Tuensang districts in the north, Manipur state in the south and Kohima district in the west. Phek is derived from the word "Phekrekedze" meaning watch tower. Earlier a part of Kohima district, it was made a separate district on December 21, 1973. It is inhabited by the Chakhesangs and Pochurys. The word "Chakhesang" an amalgamation of the names of three sub-tribes - "cha" from "Chokri", "khe" from "Khezha (Kuzha)" and "Sang" from "Sangtam (Pochury)". There are at least three main linguistic groups in the district, namely, Chokri, Khezha and Pochury. The medium of communication among the people is mainly Tenyidie and Nagamese. It is a hilly district rich in flora and fauna. There are three important rivers namely Tizu, Lanye, and Sedzu and three important lakes called Shilloi, Chida and Dzudu.

Places of Interest

Pfutsero

The coldest town in Nagaland. Apples are grown here, at an altitude of 2,133.6 meters above sea-level.

Khezakenoma Village

Believed to be the originating place of many of the southern Naga tribes from where further migrations into the wild had begun. Legends speak of a slab of stone in this village, which was supposed to multiply paddy when spread over it for drying. This stone is still preserved.

Shilloi Lake

Also known as the Lachem Lake, lies on the lower slopes of the hill ranges running along the Myanmar borders. Spread over 0.25 to 0.30 sq. km., the lake has the shape of a footprint. The lake is believed to be the abode of spirits. The water is dark grey, perhaps because of the large amount of silt, adding to the mystery

Footprint shaped Shilloi lake

Culture & Traditions

The Chakhesangs and Pochurys are known for their rich cultures and traditions. There are a varieties of traditional attries and ornaments. The melodies folk songs and the lively folk dances are feast for the ears and eyes. The people are experts' craftsman and excel in making pots, baskets, sculptures and furniture. The socities is patrimonial but women enjoy a high status in their families.

The customary laws are unwritten but practise by all villages. These laws are binding to members of the society and were passed on from generation to generation by the word of mouth. The elderly people of the village decide and passed judgment on disputes and matters concerning the village.

Location & Geographical Area

Phek gets its name from the word ‘Phekrekedze’ meaning watchtower. The geographical area of Phek district covers 2026 sq. kms that is 12.22 percent of total geographical area of the State. The altitude ranges from 400 meters at Tizü river bed (below Avangkhu village near the border of Myanmar) to 3040 meters above sea level at Mollen peak. It is situated in the southeastern hill region of the State. It borders with Myanmar in the East, Manipur State in the South, Kohima district in the West and Zunheboto and Kiphire districts in the North.

1.1 Topography

The topography of Phek district is undulating with gentle slope to high slope. With varied geo-climatic conditions, Phek district is ideally suited for horticulture, floriculture and other plantation crops. A variety of fruits like pineapples, banana, orange, lemon, mango, papaya grow abundantly in the region. The region is famous for the different types of fruits and vegetables grown. Phek is also richly endowed with varieties of medicinal plants having high value in the international market. But, due to the lack of proper infrastructure, transport and communication system and geo-political condition of the region these resources largely remained untapped.

1.3 Availability of Minerals

Phek is blessed with evergreen sub-tropical and temperate coniferous forests which support a myriad of flora and fauna. The Geological Survey of Nagaland reports that there is one million tonnes of reserved limestone at Wazeho, decorative and dimensional stones, coal in Akhegwo, Yesi, and Molen. Brine is also found in Meluri sub-division in the district. This locally baked salt, as per medical experts, are goiter free and good for health).

Crystalline limestone is also to be found in Moke and Satuza. Iron Chromium, Nickel, Cobalt, Copper, Molybdenum, Chromite, Magnesite, asbestos, talc, marble are also some of the mineral deposits found in the district. Presently, the State's only Cement factory in Wazeho (Meluri sub-division) is producing 100 TPD, also, there at Wazeho, a Decorative Stone Factory has been inaugurated recently.

3.10 Potential for new MSMEs:-

The district of Phek is considered backward as far as Industrial Activity is concerned. Traditionally, the people in the district work on metal with simple technology but most of the production is meant for household needs and requirement. Basketry, weaving, Stone crushing, Wood based units, Saw mill, Cement craft, Steel Fabrication, wood carving, pottery, Handloom products, Cane & Bamboo products, Stone Tiles, Spinning and Blacksmithy, Food processing units, Carpentry are traditionally activities in which a sizeable number of the local people are skilled. Along with traditional activities, The DIC, Chozuba of Phek district can introduce new Schemes for the benefits of Entrepreneur, to take up programmes for up-gradation new Technology under M/o MSME, Govt. of India like MSE-CDP, MSE-MDA, TREAD for women, Lean manufacturing, Design clinic, ICT, Bar Code, IPR etc in long run.

Development of agro-processing units like extraction of fibres from pineapple leaves, dehydration unit for ginger and cardamom, extraction of citronella oil are some potentials non-farm activities, which can be developed in the district. New scheme are patchouli cultivation, Tea garden and vanilla cultivation in the district. On the basis of availability of raw material, labour and other infrastructure, non-farm sector investment in the district can be in the following areas:-

Agro-based.

| 5. Mini Rice mills | 10 |
| 6. Handloom demonstration unit | 4 |

To encourage prospective entrepreneurs to take up industrials activities, there are provisions to provide margin money/ seed money/ subsidy by the implementing agencies. However there are several constraints that may be highlighted are:-

- a) Lack of basic infrastructure facilities, in-adequate marketing support/ accessibility and raw material supply.
- b) In-adequate power supply
- c) Shortage of skilled /trained manpower
- d) Lack of industrial experience, non-availability of managerial, administrative and technical experience among the local entrepreneurs.
- e) High cost raw materials and transportation
- f) Lack of co-ordination among various development agencies
- g) Credit flow is very low due to poor return of bank loans.

5.0 General issues raised by industry associations during the course of meeting

1. Non- reorganization of EM-II acknowledgment by some of the state government agencies.
2. Re-constitution of MSEFC in the state of Nagaland at the earliest.
3. CLCSS
 - I. lack of awareness among branch level bankers.
 - II. There should be some mechanism for tracking of application status, so that the entrepreneur gets present status of their application.
4. Bankers avoid accepting the cases under CGTMSE especially for the new Entrepreneurs and insist for the collateral security.
