Brief Industrial Profile of Kolkata District **(WEST BENGAL)**

1. General Characteristics of the District:

The foundation of a new metropolis was laid by Job Charnock in 1690. In those days, there were three villages viz. Sutanati, Kalikata and Gobindapur. Job Charnock decided upon the spot as he was attracted by the rural beauty. In 1707, Kolkata due to its growing importance was declared as Presidency. In 1717, the Company obtained permission from the Moghal Empire to purchase 38 villages extending down to both sides of Hooghly river on a stretch of 16 Km. Distance. The names of these villages still survive in locality like Bagmari, Belgachia, Sealdaha, Ultadanga, etc. With this right the British India Co. firmly established its foothold and the settlement gradually turned into a thriving and prosperous city. In 1773, Kolkata became the Capital of India, but later the Capital was shifted to Delhi in 1912. For many years, Kolkata has been a major industrial place and an important urban center in the entire Eastern and North Eastern region. It has also been claiming a dominant position in trade and commerce. The Administrative Headquarters is situated in Kolkata from the period of British rule. The district occupies 17th position in the State in respect of its size with an area of 185.39 sq. Km.

1.1 Location & Geographical Area.

District	Latitude		Longitude	
	North	South	East	West
Kolkata	22°37' N	22°30' N	88°23' E	88°18' E

The district is bounded by the North 24-Parganas district in the North, on the South by South 24-Parganas, on the East by North & South 24-Parganas and on the West by river Hooghly.

1.2 Topography

The soil, on which Kolkata district is built, happens to be a part of the alluvial deposit of the Gangetic delta and the elevation is not more than 5 to 6 metres. The texture of the soil varies from sandy loam to clay loam

The principal river of the district is the Ganges (Hooghly). The most important tributary of the Hooghly is the Bhagirathi. The width of the river Hooghly varies from 55 metres to 2.4 Km. The maximum height of the district above sea-level is 5.3 metres

1.4. FOREST

Although forest is an important resource for industrial utilization, its presence in the district is insignificant.

1.5. Administrative set up.

The district has an area of 185.39 sq. Km. Corresponding to 1, 84,000 hectares of land which is divided into 15 Boroughs and 141 Wards. A table showing the places and number of Boroughs and Wards under each of them is appended below:-

3.7 Vendorisation / Ancillarisation of the Industry

The question of ancillary development in a district arises when there is dominating presence of large/medium industrial undertakings and they can generate continuous demand for their requirement like spares components etc. In this regard the district is far ahead of. There are approximately 137 nos. large and medium scale industries. Depending upon the above industries few more ancillary units can be set up in the district.

3.9 Service Enterprises

The State has identified the Information Technology (IT) Sector as a priority sector for growth. It is also encouraging development of high end technology in the hardware and software sector as well as R & D support. At the operational level, the govt. has made it easy for the investors to set up operations through WEBEL, which is single window support centre for all IT investors.

About 230 companies are engaged in doing export from Kolkata. There are another 300 companies who are engaged in domestic business. More than 10,000 professionals are employed directly in both export and domestic sector. Growth parameters of Software Technology Park (STPK) in terms of employment and export are given below:

Year	Employment in nos.		Export (In Crore)	
	STPK	Total in IT Sector	STPK	Total in IT Sector
2005-06	20,000	55,000	2,167	2700

3.10 Potential for new MSMEs

The primary objective of conducting industrial potentiality survey in a district is to select the candidate industries. In order to select those industries, factors like infrastructure, market, etc. have been analyzed in the previous Chapters. As already mentioned the district is devoid of agriculture and mineral resources, the fish production of the district is negligible. However, the officer after meeting various promotional agencies like DIC, Bank, KMC, etc. and after examining the factors required for industrial development has suggested the following demand based candidate industries having scope for development in the small scale sector in the existing situation.

A) Demand-based industries:

a) Food & allied industries

- i) Chilli sauce
- ii) Vinegar (synthetic)
- iii) Biscuits (mechanized)
- iv) Potato wafers
- v) Pickles (from mushroom)
- vi) Ground & Processed Spices
- vii) Papad
- viii) Soya based
- ix) Canned Mushroom (Export oriented)

b) Textile products including hosiery items

5. General issues raised by industry association during the course of meeting

Kolkata being the State Capital is industrially developed and is well equipped to promote industrialization. However the MSE sector still needs support from the Govt. on issues like credit availability, obtaining fire license, linking of trade license with fire license, rehabilitation of sick units, etc. Further, the requirement of depositing a large amount as earnest money in case of large tenders is another major problem facing the MSE sector. In the banking sector, several banks are hesitant to implement the CGTMSE Scheme, thereby posing credit problems for the MSE sector.

6. STEPS TO SET UP MSMEs

Following are the brief description of different agencies for rendering assistance to the entrepreneurs.

S. No	Type of assistance	Name and address of agencies
