Brief Industrial Profile of Mahendragarh District

1. General Characteristics of the District

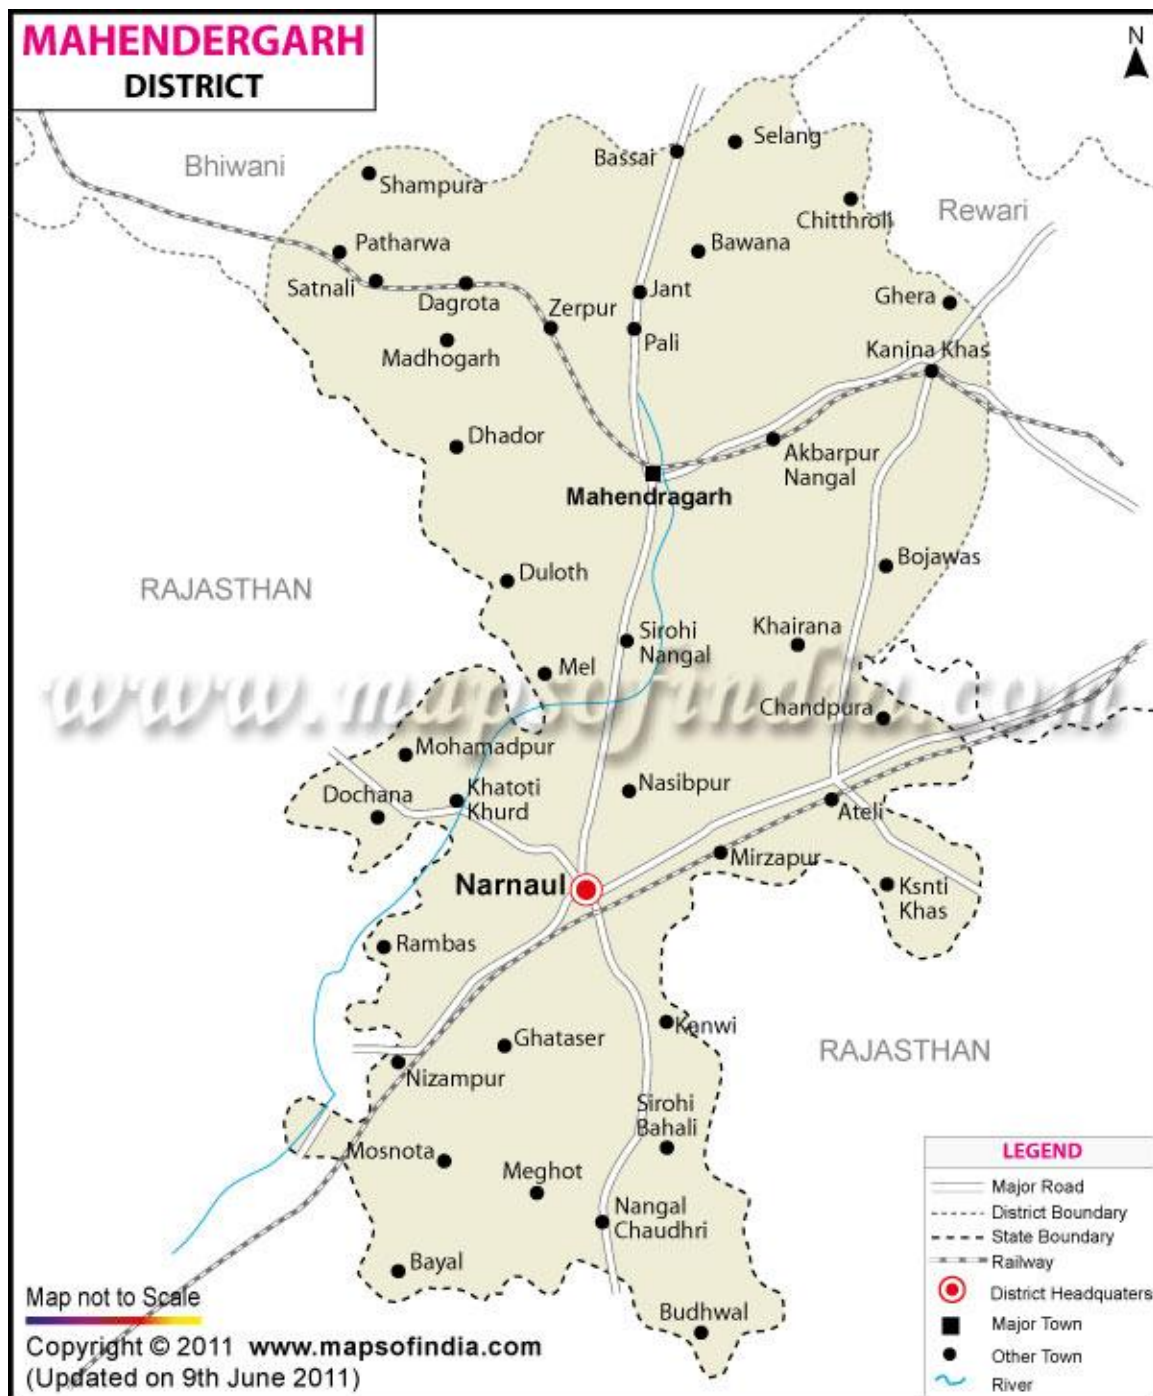

Mahendragarh district was formed in 1948 by grouping different tracts of erstwhile princely states; Narnaul and Mahendragarh tehsils from Patiala State, Dadri (Charkhi Dadri) from Jind State and a part of Bawal nizamat from Nabha State. It became a part of Patiala and East Punjab States Union (PEPSU) state. On November 1, 1956, with the merger of PEPSU with Punjab, it became a part of Punjab state and with the formation of Haryana state in 1966; it became a part of the newly formed state. Rewari tehsil of Gurgaon district was added to it in 1972 but Rewari tehsil was made a separate district in 1989.

1.1 Location & Geographical Area.

The district lies between north latitude 27° 47' to 28° 26' and east longitude 75° 56' to 76° 51'. It is bounded on the north by Bhiwani and Rohtak districts, on the east by Rewari district and Alwar district of Rajasthan, on the south by Alwar, Jaipur and Sikar districts of Rajasthan, and on the west by Sikar and Jhunjhunu districts of Rajasthan.

1.2 Topography

The district abounds in sand dunes and bare low hills of the great Aravalli range are scattered and these bare rounded formations illustrate the phenomenon of desert erosion. Tals and tibbas of the district present a desert look. The menace of advancing deserts adds complexity to the situation and poses difficulty in the extension and implementation of irrigation plans bearing heavy costs.

1.3 Availability of Minerals.

Mahendragarh district has rich mineral deposits. It enjoys unique position in the state but it is irony of the fate that these deposits have not been tapped to the desired extent and add negligible contribution to the district economy. The important minerals found in the district are lime stone, marble, sandstone, iron or silica sand, feldspar quartz, calcite etc.

Production of minerals

S.No.	Name of the Mineral	Production-2010-11
1.	Dolomite	-
2.	Quartz	2776MT in the yr (1990-91) after that no information is available
3.	Slate stone	5279MT In the year 1990-91) after that no information is available
4.	Road metal and machinery stone	-
5.	Marble	-

1.4 Forests

The district has practically no forest. Except growth keekar, jandi, maskets thornily shrubs on the waste lands and farms. The forest department has drawn up a scheme names Aravalli project which act as a natural barrier checking the advance of the deserts towards eastern Rajasthan and indo genetic plain. The objective is to provide environmental protection through restoration of green cover of village, common lands in Aravalli hills and to improve the income and living conditions of people by meeting their requirements of fuel, fodder and timber in ecological manner. Presently district has 57 Sq kms. of land under forest constituting 1.03% of the total geographical area.

1.5 Administrative set up.

For administrative purpose, Mahendragarh district is divided in to 2 tehsils, Narnaul and Mahendragarh and 3 sub-tehsils, namely, Nangal Chowdhary, Ateli Nangal and Kanina. Narnaul tehsil comprises 3 blocks: Narnaul, Nangal Chowdhary and Ateli Nangal. Mahendragarh tehsil divided in to 2 blocks: Mahendragarh and Kanina.

There are 4 Vidhan Sabha constituencies in this district: Ateli, Mahendragarh, Narnaul and Nangal Chaudhry. All of these are part of Bhiwani-Mahendragarh Lok Sabha constituency.
